

Gender Pay Gap 2017

WOKINGHAM
BOROUGH COUNCIL

Forward

Gender pay gap requires employers with 250 or more employees to publish various figures to demonstrate how large the pay gap is between their male and female employees. As a public sector organisation this demonstrates our compliance under the Public Sector Equality Duty.

Wokingham Borough council is committed to having a workplace where everyone is treated with dignity and respect and where equality of opportunity and choice is promoted for all employees. A diverse and inclusive workforce isn't just good for women – it's good for everyone.

Charlotte Haitham-Taylor and I are one of a very few female Leader and Chief Executive combinations in the UK and we take our jobs as female role models very seriously.

We are proud that our council has working hours and practices which are flexible and enable people to balance work and life in a sustainable way, therefore encouraging more women to make their career in the public sector and supporting more women to return to work on a flexible basis.

We also want to shape our community to ensure good growth, where nobody is left behind. Not only are we raising the aspirations of our workforce we are also supporting our wider community by encouraging educational attainment and developing a progressive apprenticeship strategy.

The value of inclusion and harnessing diversity should not be underestimated and we are proud of the opportunities available to all at Wokingham.

Manjeet Gill

Interim Chief Executive

Introduction

The Equality Act 2010 (Gender Pay Gap Information) Regulations 2017 require Wokingham Borough Council to produce an annual report on the differences in aggregate pay and bonuses of men and women based on a snapshot of data on 31st March each year. This includes data for 'relevant employees' which relates to three groups of staff and workers at WBC. These are:

- Staff including those on permanent and fixed term contracts
- Casual workers who received pay during the reporting period (March 2017 payroll)
- Staff at Foundry College including those on permanent and fixed term contracts

Local authorities are not required to include school based staff in their Gender Pay Gap reporting.

Employers are required to report:

- The difference in the mean pay of full-pay men and women, expressed as a percentage
- The difference in the median pay of full-pay men and women, expressed as a percentage
- The difference in mean bonus pay of men and women, expressed as a percentage
- The difference in median bonus pay of men and women, expressed as a percentage
- The proportion of men and women who received bonus pay
- The proportion of full-pay men and women in each of four quartile pay bands

A positive percentage figure reveals that female employees have a lower average pay or bonus than male employees. A negative percentage figure reveals the opposite, i.e. male employees have a lower average pay or bonus than female employees.

It is important to understand that gender pay gap measures the difference between men and women's average earnings across the organisation. This is distinctly different from equal pay, as set out in the Equality Act 2010, which requires that men and women in the same employment performing the same, or similar, jobs of equal value receive equal pay.

Further information on the Gender Pay Gap is available at www.acas.org.uk/genderpay.

Wokingham Borough Council is committed to the principle of equal opportunities and equal treatment for all employees, regardless of sex, race, religion or belief, age, marriage or civil partnership, pregnancy/maternity, sexual orientation, gender reassignment or disability. We have a clear policy of paying employees equally for the same or equivalent work, regardless of their sex (or any other characteristic set out above). As such, we:

- carry out pay and benefits audits at regular intervals;
- evaluate job roles and pay grades as necessary to ensure a fair structure.

We are therefore confident that our gender pay gap does not stem from paying men and women differently for the same or equivalent work. Rather our gender pay gap is the result of the roles in which men and women work within the organisation and the salaries that these roles attract.

WBC Workforce Profile

Like most public sector employers, WBC has a workforce which comprises a wide and diverse range of skills from numerous industry sectors including front line service and support for adults and children, customer services, education, health, leisure, building control, planning and professional services.

At the time of reporting our 'relevant employee' workforce was made up of:

74% Female
(887)

26% Male
(309)

Ratio of 3:1

41% Part Time
(490)

59% Full Time
(706)

Ratio of 2:3

In addition to the Gender Pay Gap reporting requirements we have reviewed how the mean and median pay gap is reflected for our full time and part time workforces separately. All casual workers have been counted as part time. A significantly higher proportion of females (49%, 433 women) work part time compared to males (18%, 57 men).
