

TITLE	LAND ADJACENT TO UPPER THAMES ROWING CLUB, REMENHAM LANE, REMENHAM RG9 3DB PREMISES LICENCE PR0255 (CORD PROMOTIONS) APPLICATION FOR REVIEW OF THE PREMISES LICENCE
FOR CONSIDERATION BY	Sub Committee of the Licensing and Appeals Committee on 17 January 2013
WARD	Remenham & Wargrave
STRATEGIC DIRECTOR	Paul Anstey, Joint Service Delivery Manager for Environmental Health & Licensing

OUTCOME / BENEFITS TO THE COMMUNITY

In accordance with S51 of the Licensing Act 2003 and the Wokingham Borough Council Licensing Policy, the application is referred to the Licensing and Appeals Sub Committee for determination as an application for a review and representations have been received.

RECOMMENDATION

The Sub Committee to determine the application to grant or refuse the application, with conditions and/or amendments as appropriate.

SUMMARY OF REPORT

To provide relevant information for the Sub Committee to consider and determine the application from Environmental Health Environmental Quality Team as a responsible authority to review the premises licence PR0255 for Land Adjacent to Upper Thames Rowing Club (Cord Promotions).

Background

Section 51 of the Licensing Act 2003 provides for a responsible authority to apply to the licensing authority for a review of a premises licence where problems associated with the licensing objectives are occurring.

The representation must relate to particular premises for which a premises licence is in existence and must be relevant to the promotion of the licensing objectives.

Before determining the application, the authority must hold a hearing to consider it and any relevant representations, and take steps as it considers necessary for the promotion of the licensing objectives. The options open to the Sub Committee are:

- Modify the conditions of the licence (The conditions of the licence are modified if any of them is altered or omitted or any new condition is added) (for a period not

- exceeding three months or permanently)
- Exclude a licensable activity from the scope of the licence (for a period not exceeding three months or permanently)
- Remove the designated premises supervisor
- Suspend the licence for a period not exceeding three months
- Revoke the licence
- Issue formal warnings to the designated premises supervisor and/or premises licence holder
- Take no action

In determining the application, the Licensing Authority has a duty to carry out its functions with a view to promoting the four licensing objectives, which are:

- The prevention of crime and disorder
- Public safety
- The prevention of public nuisance
- The protection of children from harm

For the purposes of the Licensing Act 2003, a child is an individual aged under 18.

The Licensing Authority must also have regard to the representations received, the Licensing Authority's statement of licensing policy and the statutory guidance issued under Section 182 of the Licensing Act 2003.

The application for review of the premises licence was received from Joe Dray on behalf of Environmental Health Environmental Quality Team on 19 November 2012.

The grounds for review are that the existing conditions on the licence are inadequate and cannot be enforced. New conditions are therefore proposed. Complaints from local residents have been received.

The proposed amendments and additions to the licence conditions were submitted by email on 6 December, attached as Appendix Four

The following documentation is attached – copy of the application (Appendix One), location / layout plans (Appendix Two), copy of the current premises licence (Appendix Three), supplementary documentation from Environmental Health Environmental Quality Team (Appendix Four), Thames Valley Police representation (Appendix Five).

The application was checked and confirmed to be correctly made. The 28 day consultation period ran until 17 December 2012. The licence holder, responsible authorities, ward members and parish council were advised of the application by email on 19 November 2012.

The application has been advertised correctly, with site notices displayed at Wokingham Borough Council offices and at the premises (put up at the premises with the landowner's consent on 19 November 2012)

During the statutory consultation period of 28 days, representations were also received from:

- Thames Valley Police requesting changes and additions to the licence

conditions, attached as Appendix Five

The licence holder (Stuart Gensian) was contacted by Joe Dray to see if he would agree to the amendments he proposed being made to the licence – Stuart confirmed by email on 14th December that he agreed to this (Appendix Six).

FINANCIAL IMPLICATIONS OF THE RECOMMENDATION

	How much will it Cost/ (Save)	Is there sufficient funding – if not quantify the Shortfall	Revenue or Capital?
Current Financial Year (Year 1)	Not applicable		
Next Financial Year (Year 2)	Not applicable		
Following Financial Year (Year 3)	Not applicable

|---|-------------------------------------|
| 1) the prevention of crime and disorder | <input type="checkbox"/> |
| 2) public safety | <input type="checkbox"/> |
| 3) the prevention of public nuisance | <input checked="" type="checkbox"/> |
| 4) the protection of children from harm | <input type="checkbox"/> |

Please state the ground(s) for review (please read guidance note 2)

Noise monitoring took place during the week of Henley Royal Regatta this year and it was established that a *public nuisance* existed as a result of high noise levels emanating from the premises and the cumulative effect of noise emanating at the same time from the adjacent licensed premises.

A number of complaints were received during and after the events from local residents.

The existing conditions relating to the prevention of public nuisance are not adequate and an existing condition Annex 2 (d) Prevention of Public Nuisance, has little or no relevance to that objective.

Complaints were received about the setting up and dismantling activity before and after the Henley Regatta week and this needs to be controlled by condition(s) . The current licence does not cover periods of time outside the Henley Regatta Week.

2/2/2011

Please provide as much information as possible to support the application (please read guidance note 3)

See relevant section of report on monitoring that took place during Henley Royal Regatta 2012 (attached)

Notes for Guidance

1. A responsible authority includes the local police, fire and rescue authority and other statutory bodies which exercise specific functions in the local area.
2. The ground(s) for review must be based on one of the licensing objectives.
3. Please list any additional information or details for example dates of problems which are included in the grounds for review if available.
4. The application form must be signed.
5. An applicant’s agent (for example solicitor) may sign the form on their behalf provided that they have actual authority to do so.
6. This is the address which we shall use to correspond with you about this application.

Review of Premises Licence PRO 255 (Cord Promotions)

Land Adjacent to Upper Thames Rowing Club

My name is Jonathan Peter Dray; I am employed by West Berkshire and Wokingham Environmental Health and Licensing Service as a Principal Environmental Health Officer within the Environmental Quality Team. I am a chartered member of the Chartered Institute of Environmental Health.

The Environmental Quality Team is the 'responsible authority' for 'The Prevention of Public Nuisance' licensing objective. I am applying for this review of the premises licence for 'Land Adjacent to Upper Thames Rowing Club' on the grounds that the licensing objective 'the Prevention of Public Nuisance' is not being met.

I and a colleague carried out noise monitoring at various locations during the week of the Henley Royal Regatta on 29th and 30th June 2012. Following receipt of complaints from local residents, monitoring of noise from Upper Thames Rowing Club (and Old Blades) took place at 'Cherwell' a residential property approximately 300 metres from the premises. A summary of the complaints received and the results of this noise monitoring are presented in a separate report.

It is my opinion that noise from Upper Thames Rowing Club combined with noise from the neighbouring licensed premise, 'Old Blades', caused a Public Nuisance. The cumulative effect resulted in a discordant noise that was intrusive and disturbing over several days and evenings.

Complaints were also received after the event about noise arising from setting up and dismantling activity before and after the week of the Henley Royal Regatta.

I have considered the existing licence conditions that relate to the 'Prevention of Public Nuisance' objective and have the following comments:

Annex 2 d) Prevention of Public Nuisance – "*Staff will continually monitor the public for any excessive drinking within the enclosure and any persons seen to be under the influence will be refused further alcohol on the premise*" – this condition does not directly relate to the public nuisance objective.

Interested Party 1) "*Noise levels should not exceed.....etc.*" This condition is not clear and may therefore be difficult to enforce

There is no condition that specifically requires noise monitoring and control procedures to be put in place before, during and after the week of the Henley Royal Regatta.

There is no condition to control noise and disturbance from setting up and dismantling before and after the event.

It is my *recommendation* to the Licensing Committee that the licence conditions relating to the Public Nuisance objective be amended to ensure that they all aspects of potential public nuisance and that are reasonable, measurable, clear and enforceable. It is also my *recommendation* that the periods of time covered by the licence be

extended to one week either side of Henley Royal Regatta week to ensure that noise and disturbance arising during setting up and dismantling can be controlled by condition.

It is my intention to present a list of conditions for consideration by the Licensing Committee that has been agreed in advance by both the local residents' association and the licence holder.

On the 8th October I and a colleague met with members of the Remenham Farms Residents' Association to discuss the list of draft conditions that had been prepared. A number of minor amendments were made following this meeting and the Residents' indicated that they were content with the conditions proposed. A copy of the draft conditions was sent by email to the licence holder and we await their comments

On the 5th November 2012 I received a letter from the Remenham Residents' Association (attached) summarising their concerns about this and the neighbouring licence. I must point out that the number of additional issues have been raised by the Residents' Association that I am not able to address.

It is hoped that through the imposition of revised conditions the likelihood of public nuisance arising from this premises will be significantly reduced in future years.

J P Dray

PRO 256 Land adjacent to Upper Thames Rowing Club (In the Spirit / Welsh Hog) Oarsman / Regatta Village

Existing conditions relevant to Public Nuisance Objective

Prevention of Public Nuisance

The Applicant is clearly aware of the impact the event which occurs annually, has on the surrounding area and local residents and over the years they have been running the event, have built up a good relationship with the local community.

The latest event will cease at 12 midnight and will take place on the Friday and Saturday. For the last 30 minutes of the event the volume of music will be substantially reduced

Interested Party

Noise levels should not exceed 55dB(A) measured over a fifteen minute period one metre from the façade of any noise sensitive premises (particularly the dwelling of any parishoner) with windows open in a typical manner for ventilation between the hours of 9.00am and the hours above (Monday to Thursday 11.00pm; Sunday 10.30pm; Friday and Saturday 12.00am - 24.00) and noise sensitive premises (particularly the dwelling of any parishoner) with windows open in a typical manner for ventilation. A noise sensitive premise includes premises used for residential purposes, hospitals, and similar institutions, educational establishments (when in use) or places of worship (during recognised times and days of worship) or any premises used for any purposes likely to be affected by the noise.

There will be no fireworks at this event

The area to which the licence relates will be left clean and tidy together with any adjoining area to the premises including the towpath.

Noise Sources

The main source of noise at this location was a venue called 'The Oarsman' and consisted of live and recorded music. Other noise sources were present but much less significant.

Noise Monitoring and Control (Licence Holder)

There was no evidence of any noise monitoring or control

Compliance Monitoring and Observations

Monitoring that included the contribution from 'The Oarsman' took place at 'Cherwell' See results listed above under 'PRO 288 Old Blades.

Although the noise limit of 55dB(A) measured over 15 minutes imposed by condition may have been exceeded at Cherwell it was not possible to assess or apportion the contribution from the Upper Thames Rowing Club site. It is possible that, in isolation and if the dwelling 'Old Blades' is discounted as a noise sensitive location, the noise limit would not have been exceeded. As discussed above it was the cumulative effect of the two sources that gave rise to the complaints received.

Complaints arising

See complaint list in 'Old Blades' section above. Contribution from this site included in complaints received.

Conclusion

As discussed above it was the combined effect of two noise sources that caused a nuisance and gave rise to complaints. Given that this noise source is slightly further away

form the nearest noise sensitive receptor than Old Blades it is clear that its contribution to the overall cumulative impact may have been slightly less significant.

Given that the two noise sources in question may be controlled by the same company (The Spirit Group) there may be scope for an informal resolution.

Options appraisal (for UTRC and Old Blades)

Do nothing

Given the nature noise that was heard during monitoring and the complaints received this is not considered an appropriate option.

Informal Action

It may be possible to address the issues raised informally. This could result in a voluntary agreement being reached between Environmental Health and the licence holder that would not be enforceable and could merely delay the inevitability of a licence review. This action would preclude input from local residents or their elected representatives.

Review of Licences

It may be appropriate to call for a formal review of the licences. As mentioned above the existing conditions for the control of public nuisance are not fit for purpose. They do not impose maximum noise levels, they are difficult for the licence holder to achieve and they are not enforceable. A review of the licence would permit the addition of new conditions to the licence that will:

- impose specific noise limits at agreed locations that are measureable and achievable;
- ensure that a noise management plan is produced and subsequently updated year on year in response to complaints or incidents;
- ensure that the licence holder takes responsibility for the monitoring and control of noise and other potential public nuisances arising from their activity;
- ensure that the licence holder liaises effectively with the neighbouring licence holder to minimise the risk of a 'cumulative' impact. (It is understood that the licences are effectively run by the same company so this should be achievable)

It is understood that other 'responsible authorities' have raised concerns about other issues and their impact upon other licensing objectives. These issues could also be addressed by a review of the licence.

Service of Noise Abatement Notice

An element of control could be achieved by service of an abatement notice under s.80 of the Environmental Protection Act 1990 on the grounds that a statutory nuisance is likely to recur in the future. The schedule to a notice would list steps that must be taken or works that must be carried out to prevent the recurrence of a nuisance. These may include, for example, the setting of noise limits and the implementation of a noise management plan.

Given that a nuisance may have arisen partly as a result of the cumulative impact of two noise sources at two separate premises this may not be the most appropriate course of action. It is also relevant that an abatement notice has a limited lifetime and if regular reminders are not issued may become 'stale' and un-enforceable.

Service of an abatement notice would only address noise but not other issues covered by the public nuisance and other licensing objectives.

5th November 2012

Dear Joe

Old Blades and Land adjacent to the Upper Thames Rowing Club

The Remenham Farm Residents Association represents the householders within the cartilage of Remenham Farm and the church. As you know, I write on their behalf.

Normally over the years our concern has been the activities of Remenham Farm, which for all our residents is our principal neighbour and as such is likely to be the greatest influence on our households.

This year we have all been affected by the overwhelming nuisance caused by the activities at Old Blades and Upper Thames by very loud amplified sound and antisocial behaviour. This was during the period Tuesday 29th June through to Sunday 1st July, prior to that and thereafter.

Both establishments were managed by the same operator.

The sites of Old Blades and Upper Thames are difficult sites for traffic movements resulting in trucks parked up on the road and impeding other traffic for at times considerable delays. This site does not use white sound for reversing.

Particularly irksome was the noise on Sunday 1st July between 4.00pm and 10.30pm when all other operators had ceased and there was virtually no clientele. By doing so it obliges the authorities – police, council, fire and ambulance to be available when all other activities have ceased elsewhere and gives rise to a great deal of public nuisance.

The license for Old Blades states that “music will be kept to a sensible level during opening periods and will stop at midnight”. The nearest noise sensitive premise in the RFRA is Cherwell (John Halsall’s house) approximately 200m from the establishment at Old Blades and 400m from that on the land of Upper Thames. We measured the amplified sound on Friday 29th June 13.30 -23.45, Saturday 30th June 11.00 - 23.45 and Sunday 1st July 11.00 - 14.15 at Cherwell. WBC observed that the sound (MNL LAeq 15 minute) was continuously in excess of was 60 dBA . The continuous noise coming from Maggie’s over a six day period was extremely

Telephone 01491 572964
michaelrdudley@me.com

loud. Whilst the LAeq was 60 ; the LCEq was well in excess of 70dBA throughout. It is unreasonable to have to live with this over such a long period and certainly does not come within the definition of "sensible".

The License at land adjacent to Upper Thames is even more restrictive for noise but we believe was breached.

Several representations were made to the landowner of Old Blades, Peter Sly, who was unwilling to intervene.

The Licensee at Old Blades/Upper Thames also damaged the towpath by driving over the towpath with a tractor. It took three months after HRR for repair to the land to occur and as yet the tow path has still not been repaired.

The footpath Remenham 4 is closable during HRR but not prior and thereafter, the landowner closed it several days before HRR and it was closed several days thereafter. The Land Owner had previously undertaken (last year) to the Parish council in writing not to close it at all after his contractors had closed it in 2011.

The litter at Old Blades and Upper Thames persisted until two weeks after the end of HRR.

We feel that the public nuisance conditions of the licenses were breached. We would like the a variation included in the licence to Old Blades and would ask WBC to promote such conditioning by agreement:

1) During Henley Royal Regatta all amplified speech, amplified music or amplified sound emitted from the premises shall not be audible within the nearest noise sensitive premises with the windows open in a manner typical for ventilation before 11:00 hours or after 23:00 hours from Monday to Saturday and before 11:00 hours or after 16:00 hours on Sunday.

2) During Henley Royal Regatta the music noise level (MNL, (LAeq)) when measured at one metre from the nearest noise sensitive dwelling (Cherwell) between 11:00 hours and 23:00 hours Monday to Saturday, and between 11:00 hours and 16:00 hours on Sunday, shall not exceed the background noise level by more than 12dB(A) measured over a 15 minute period.

3) At least four weeks prior to events taking place during the Henley Royal Regatta the licence holder will carry out a background noise survey over a 24 hour period. The background noise level to be determined at the boundary of the licensed premises located closest to the nearest noise sensitive property. The results of the background survey will be submitted to the Licensing Authority for agreement, with the lowest background noise level being used to determine the music noise level (background noise level plus 12dBA). Alternatively, with the agreement of the Licensing Authority, the licence holder may establish music noise levels for different periods of the day and evening dependant upon any significant variation in the background noise level measured throughout the day and evening. The licence holder will agree both the measured background level(s) and derived music noise level(s) with the Licensing Authority by written agreement at least three weeks prior to the event. *N.B. The background shall be taken as the prevailing sound level at the location, measured in terms of LA90,T on an equivalent day and at an equivalent time when no events or sound checks are taking place)*

4) For activities arising from and in connection with the setting up and dismantling of temporary structures, plus the delivering and assembling of equipment within the premises and similar associated activities, the noise shall be adequately controlled to ensure that, so far as is

reasonably practicable, no undue noise disturbance is caused to the occupiers of residential premises in the vicinity. This will be a condition of work for any employee, contractor or sub-contractor on the premises. Such activities shall not take place earlier than 0800 hours or later than 2200 hours.

The noise to be controlled shall include the warning alarm emitted from reversing vehicles. All vehicles, where possible, to be fitted with 'white noise' reversing alarms whereby noise from the alarm is confined to the immediate danger area. If vehicles have not been fitted with white noise reversing alarms then reversing alarms shall be disabled and a banksman will be tasked with supervising and ensuring the safety of all reversing manoeuvres.

5) At least 3 months prior to the events a detailed noise management plan (NMP) shall be prepared and submitted for written approval to the Licensing Authority. The noise management plan will include the following:

- a description of the resource being provided to monitor noise and how it will be deployed;
- details of equipment to be used to monitor noise and how it will be deployed;
- details of how and where noise levels will be monitored and how this will translate into active control of noise from the event;
- details of liaison with the neighbouring licence holder, both before and during the event;
- details of noise criteria that will apply to any noise sensitive location or any monitoring location;
- details of any acoustic screening that may be erected;
- a listing of all amplification equipment and their rating in terms of wattage;
- Details of any works or arrangements which are considered necessary, desirable or good practice to reduce off-site noise levels (e.g. acoustic screening, location and orientation of performance areas etc
- Details of management arrangements for the control of noise;
- Consideration of incidental noise sources and their management e.g. noise arising from setting up and dismantling activity.
- Details of communications between staff monitoring noise on and offsite and with the neighbouring licence holder.

6) The licence holder will engage suitably experienced and suitably qualified persons to monitor and manage noise during the events in accordance with the agreed noise management plan.

7) The licence holder will provide to the Licensing Authority a report summarising the outcome and results of noise monitoring of events that have taken place that year within four weeks of the final event of the calendar year. This report will also be provided to any other interested party on request.

8) The licence holder shall review the noise management plan each year to consider any noise related issues that may have arisen during any event and any complaints received. Where necessary amendments shall be made to the plan that take into account the findings of each review and ensure that the issues, where necessary, are addressed and do not recur. The revised management plan will be submitted each year in accordance with condition 5 above

9) All vehicle movements on Remenham Lane to and from Old Blades and Upper Thames will be monitored by a marshal and vehicles will not be allowed to park on Remenham Lane awaiting entrance.

10) The Licensee clears the site every evening of all rubbish, paper, cups, and any other mess restoring the field, towpath, river and adjoining area to a pristine condition for the following day. Wokingham Borough Council in its absolute discretion will be entitled to appoint contractors to restore the field, towpath, river and adjoining area to a pristine condition at the cost of the licensee should it believe that the licensee is not undertaking this obligation.

11) The Licensee will reimburse Wokingham Borough Council for the cost allocated to them by Wokingham Borough Council of traffic marshals for Henley Royal Regatta appointed by Wokingham Borough Council.

12) The Licensee will not close Remenham 4 all or in part during, before or after Henley Royal Regatta and will not permit vehicular access on Remenham 4.

Yours Sincerely

Michael Dudley
For and on behalf of Remenham Farm Residents Association

In addition please also consider those observations contained in the Three Spires Accoustics report in so far as they relate to Old Blades and Upper Thames.

Kind regards

Michael Dudley - Remenham Farm Residents Association

1. INTRODUCTION

Three Spires Acoustics Ltd have been commissioned by Remenham Farm Residents Association to undertake a music noise compliance assessment of events run by The Copas Partnership and the Rewind Festival during the summer season 2012. The Residents Association is concerned that noise from events has caused significant disturbance in previous years and may not be complying with the premises licence conditions issued by Wokingham Borough Council.

This report presents the findings of the assessment along with recommendations regarding possible future actions.

1.1. OBJECTIVES

- To determine the A-weighted and octave band, L_{90} , and L_{eq} ambient and background noise at residential properties in the absence of entertainment noise.
- To undertake measurements of event music noise and assess against the music noise Premises Licence Conditions.
- To make recommendations regarding future actions

2. EVENTS & SITE

Remenham Village is located close to the River Thames just outside Henley and consists of a number of residential properties, Parish Hall and Remenham Church as well as Remenham Farm.

There are several events held on land owned by the Copas Partnership which affect Remenham Village. Table 1 below details the scheduled events held during 2012.

Table 1: Copas Events 2012

Date	Event	Monitoring Location	Monitoring
21 April-	Private wedding - adjacent to Temple Island.	Remenham Manor	Unattended
9 June -	Private wedding - adjacent to Temple Island.	Remenham Manor	Unattended
15-17 June	Henley Women's Regatta.	Cherwell	Unattended
27 June - 1 July -	Henley Royal Regatta.	Cherwell	Attended Sat 30th
4 August -	Private wedding - adjacent to Temple Island.	Remenham Manor	Unattended
17-19 August -	Rewind Festival.	Remenham Manor	Attended

Aerial photographs detailing the location of the Barn Bar Stage, Rewind Festival and measurement positions are presented in figure 2 & 3 of Appendix A.

3. CRITERIA

3.1. LICENSING ACT 2003

The Licensing Act 2003 established a single integrated scheme for licensing premises, which are used for the supply of alcohol, to provide regulated entertainment or to provide late night refreshment. Authorisation to carry on some or all of these licensable activities is now contained in a single license – The Premises License.

The legislation focuses on four clear objectives;

- The Prevention of Crime & Disorder
- Public Safety
- The prevention of public nuisance
- The protection of children from harm

With regard to the prevention of public nuisance, the applicant must demonstrate within their operating schedule the means they intend to employ to meet the objective. Local Authority “responsible authorities”, typically environmental health departments, when noise is being considered, must have regard to the objective when considering making a representation.

3.2. PUBLIC NUISANCE

Other persons (formerly interested parties) and responsible authorities may make representations based on the public nuisance objective. The Act or Guidance does not define public nuisance, although the Guidance states that licensing authorities should adopt the “broad common law” meaning. In summary, the common law says that public nuisance means:

- Any nuisance is “public” which materially affects the reasonable comfort and convenience of the life of a class of her Majesty’s subjects.
- Public nuisance is a nuisance which is so widespread in its range and indiscriminate in its effect that it would not be reasonable to expect one person to take proceedings on his own to put a stop to it; but that it should take on the responsibility of the community at large.
- The question whether the local community within that sphere comprises a sufficient number of persons to constitute a class of the public is a question of fact in every case;
- A sufficiently large collection of private nuisances, to more than one person/household, can be a public nuisance
- Nuisance is assessed in terms of frequency of event, duration, time of day, absolute level, etc. and must materially unreasonably affect the ordinary use of property.

Therefore, with respect to the promotion element of the public nuisance objective, applicants and responsible authorities should place restrictions/conditions to ensure that noise from regulated entertainment is just below the threshold for public nuisance.

3.3. CONDITIONS

Associated guidance which accompanied the Licensing Act 2003 states, that each application must be considered on its own merits and any conditions attached to licences and certificates must be tailored to the individual style and characteristics of the premises and events concerned and as such standardised conditions should be avoided

Conditions must be appropriate to promote one or more of the four licensing objectives. Such conditions must also be expressed in unequivocal and unambiguous terms to avoid legal dispute. Conditions must be precise and proportionate and should avoid duplication of existing legislation such as Health & Safety at Work etc Act 1974 and Environmental Protection Act 1990.

3.4. CODE OF PRACTICE ON ENVIRONMENTAL NOISE CONTROL AT CONCERTS

This Code of Practice addresses environmental noise control at concerts and similar large music events involving high powered amplification when held in sporting stadia, arenas, open air sites and within lightweight buildings. Various guidelines and criteria are described.

For events held between 0900 and 2300 the Music Noise Level (MNL) when assessed at the prediction stage or measured during sound checks or concerts should not exceed.

Table 2: Code of Practice Guideline Values

Concert days per Year	Venue Category	Guideline
1 to 3	Urban Stadia & Arenas	The MNL should not exceed 75dB(A) over a 15minute period
1 to 3	Other Urban & Rural Venues	The MNL should not exceed 65dB(A) over a 15minute period
4 to 12	All Venues	The MNL should not exceed the background noise level by more than 15dB(A) over a 15 min period

The Music Noise Level (MNL) value is the LAEQ,15minute, due to music measured at a distance of 1 meter from the facade of any noise sensitive premises

4. LICENCE CONDITONS

The Premise Licence Conditions regarding music noise issued by Wokingham District Council in 2007 are presented below;

1. All amplified speech, music or sound emitted from the premises should not be audible within the nearest noise sensitive premises with the windows open in a manner typical for ventilation before 11.00H or after 23.00H on any day, except for race commentaries at rowing events, but in any event not more than 30 minutes before the first race.

For all other forms of public address, no speaker shall be placed upstream of a point 100 metres north of the northern boundary of Remenham Manor.

2. On not more than 6 days (of which no more than 3 shall be outside the Henley Royal Regatta) the Music Noise Level (MNL) should not exceed 65 dB (A) measured over a 15 minute period at 1 metre from the façade of the nearest noise sensitive premise, between the hours of 11.00H and 23.00H; on every other night the MNL shall be adequately controlled so as to ensure that the MNL shall not at one metre from the façade of the nearest noise sensitive premises exceed the background noise level by more than 15 dBA over a 15 minute period throughout the duration of the event. The background noise level shall be taken as the prevailing sound level at a location, measured in terms of the L A90.T, on an equivalent day and at an equivalent time when no concerts or sound checks are taking place.
3. For activities arising out of and in connection with the setting up and dismantling of temporary structures, plus the delivering and assembling of equipment within the premises and similar associated activities, the sound shall be adequately controlled to ensure that, so far as is reasonably practicable, no undue disturbance is caused to the occupiers of residential premises in the vicinity. This will be made a condition of work of any employee, contractor or subcontractor on the premises. Save for the week of the Henley Royal Regatta, matters beyond the licensees control and exceptional circumstances, such activities shall not take place earlier than 07.00H or later than 23.00H where use is made of the Remenham Farm Buildings entrance.

INFORMATIVE : the sound to be controlled shall include the warnings emitted from reversing vehicles.

4. The management should ensure that all persons including staff attending functions should leave the premises as quickly and safely as possible at the end of any event. This is with the exception of those involved with night security, necessary site staff and those camping on site and is subject to the opening hours of the premises section earlier in this licence.
5. The provisions contained in this section (d) Prevention of Public Nuisance shall apply equally to any activity on the premises permitted by Temporary Event Notices.
6. The Copas Partnership shall:
 - i. provide details at the principal entrance to the Premises, in a conspicuous position, of the telephone number to ring in the event of any enquiry or complaint concerning the event;
 - ii. ensure that a responsible person is available to receive and respond to complaints at all times the premises are open to the public;
 - iii. make arrangements for details of the caller and the time, date, substance of the complaint and any steps taken at the time or proposed thereafter to address that complaint, to be recorded;
 - iv. arrange that periodic and regular observation shall be undertaken at or near the boundary to ensure compliance with the noise limits specified in conditions (d) (3) - (5) above and the observations entered into a log book which shall be made available for inspection .

5. SURVEY & RESULTS

5.1. AMBIENT & BACKGROUND NOISE ASSESSMENT

Unattended ambient noise monitoring was undertaken on three separate occasions in 2011 and 2012. Table 3 below summarise the results of the measurements. Measurements were taken 1m from the facade of the Remenham Farm Barn and Remenham Manor. Attended observations were made at the beginning and end of the survey. It is considered that the acoustic environment consists of wind noise, bird song, farm activities and occasional overflying aircraft.

Table 3: Ambient Noise Measurement Summary (dBA)

Location	Date	Time	LAeq,T dB(A)	LA90,T dB(A)
Remenham Farm Barn	14/06/2011	19.00-23.00	46	33
Remenham Manor	04/05/2012	19.00-23.00	41	36
Remenham Manor	04/08/2012	19.00-23.00	41	34

The average background level is 35dB(A) L90,4hour, therefore the maximum MNL outside the 6 event criteria of 65dB(A) will be 50dB(A) LAeq,15minute

5.2. EVENT MONITORING 2012

A combination of attended & unattended noise monitoring was undertaken during the 2012 events.

Measurements were obtained using the following instrumentation complying with the Type 1 specification of IEC 60651, IEC 61260 and IEC 61672;

2 x Bruel & Kjaer 2250 sound analysers (Serial Number 2505888 & 2764958)

Bruel & Kjaer 4231 Field calibrator (Serial Number 3001533)

The equipment was calibrated using a 4231 field calibrator both before and after each survey and no significant drift was observed. Full calibration certificates are available upon request. The analysers were set to record various parameters including broadband and statistical A-weighted and octave band sound pressure levels including L10, L90, Leq and Lmax. Measurements were simultaneously made of 1 second and 1 minute periods.

Weather conditions and wind were both noted and were favourable throughout each site survey period.

Audio capture was also enabled at a triggered threshold level in order to enable subsequent post measurement analysis to determine the exact nature of noise events.

Table 4 summarises the ambient noise assessment measured levels. A full set of measurement data is presented in Appendix B.

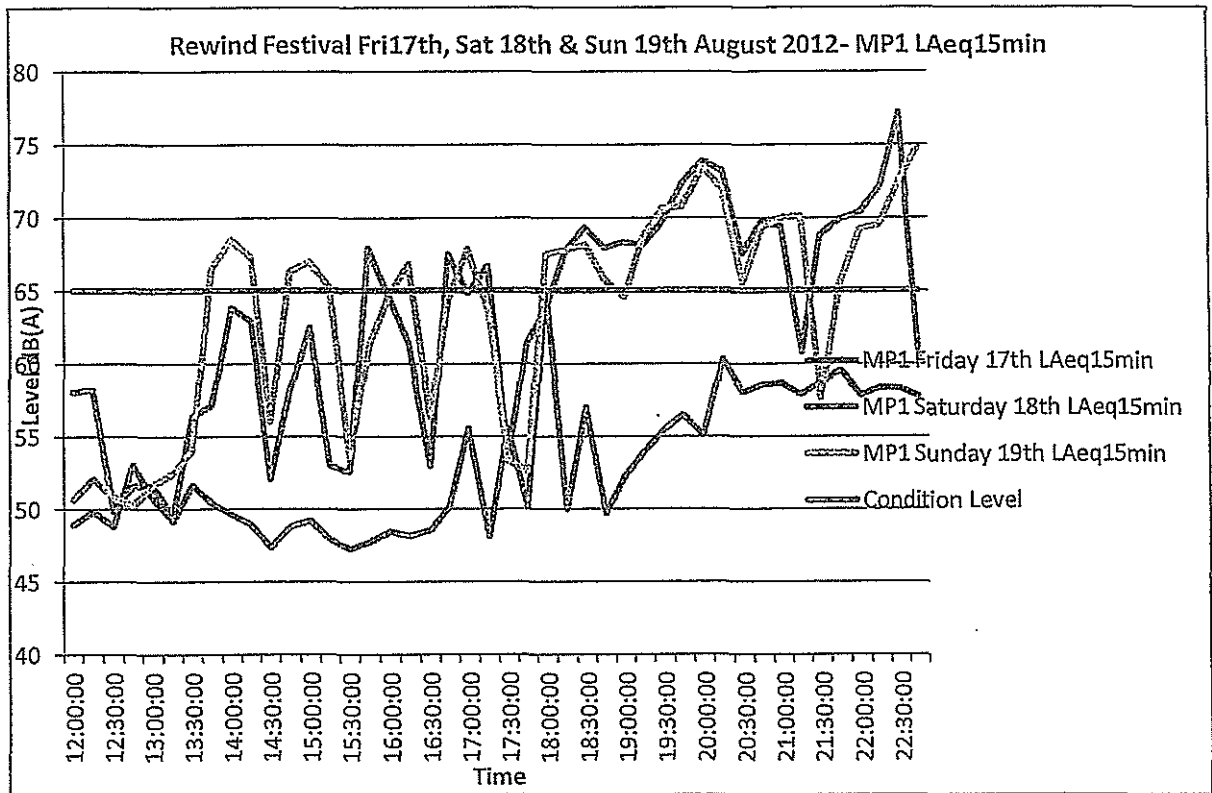

Table 4: Event MNL Compliance Table

Event	Date	Location	MNL Compliant
Private Wedding	21/04/2012	Remenham Manor	Yes
Private Wedding	09/06/2012	Remenham Manor	Yes
Women's Regatta	16/06/2012	Cherwell	Yes
x Henley Regatta	27/06/2012	Remenham Farm House & Cherwell	Yes
x Henley Regatta	28/06/2012	Remenham Farm House & Cherwell	Yes
x Henley Regatta	29/06/2012	Remenham Farm House & Cherwell	Yes
Henley Regatta	30/06/2012	Remenham Farm House & Cherwell	Minor Non Compliance
Henley Regatta	01/07/2012	Remenham Farm House & Cherwell	Yes
Private Wedding	05/08/2012	Remenham Manor	Yes
Rewind Festival	18/08/2012	Remenham Manor & Old School House	No
Rewind Festival	19/08/2012	Remenham Manor & Old School House	No

5.3. REWIND FESTIVAL

Figure 1: Time History Results – Rewind Festival

With regard to the Rewind Festival, the results of the noise monitoring indicate that for both Saturday 18th and Sunday 19th August 2012, MNL's exceed the condition level requirement for a significant proportion of the events and by a significant level above that required by the premises licence. Periodic measurements at the boundary of the Old School House also indicated that the MNL was in excess of the condition requirement.

6. ASSESSMENT

6.1. EVENT DAYS AT 65DB(A)

The Copas premises licence includes the following extract regarding events;

"On not more than 6 days (of which no more than 3 shall be outside the Henley Royal Regatta) the Music Noise Level (MNL) should not exceed 65 dB (A) measured over a 15 minute period at 1 metre from the façade of the nearest noise sensitive premise, between the hours of 11.00H and 23.00H"

It is understood that there is an agreement from the Copas Partnership regarding the Rewind Festival, which states that 2 days of the Rewind Festival will be subtracted from the 6 allowed events days at 65dB(A) reducing the Regatta days at 65dB(A) to four. This is confirmed in a letter from Sarah Copas dated 6th June 2012.

There have been five Regatta events days in 2012 within the 65dB(A) allocation and therefore this is not in accord with the said agreement .

6.2. HENLEY REGATTA

The monitoring results undertaken at Remenham Farm House and Cherwell indicate that for the vast majority of time MNL's were compliant with the premises licence conditions. We have been informed by Mr Halsall, owner of Cherwell that music noise from the event held at Old Blades caused considerable disturbance on Tuesday 26th June and Sunday 1st July, this is when monitoring was not being undertaken. We understand from Wokingham BC that this site has a separate premises licence and we have requested a copy of this to review.

6.3. OTHER EVENTS

The monitoring results for other private functions held on Copas Partnership land, largely undertaken at Remenham Manor, indicate that MNL's were compliant with the premises licence condition requirements. *Table 12 in Appendix B includes details of resident's description of other noise and public nuisance issues which have affected them during this summer's events.*

6.4. REWIND FESTIVAL

We understand that at the 2011 Rewind Festival there were a significant number of MNL breaches and that Wokingham BC formally wrote to the promoter to bring matters to their attention in order that the 2012 event would be better controlled. It would seem that there has been a failure in control procedures which allowed music noise to be in breach of the condition requirements. Breaches were on both days of the event, were for significant periods totalling over eleven hours and in excess of the MNL by up to 10dB(A), which is a perceived doubling of the noise level.

We understand that the Rewind Festival has a separate premises licence to that of the Regatta and other events, we have requested a copy from Wokingham BC for review purposes.

7. REWIND FESTIVAL – RECOMMENDATIONS

7.1. PREMISES LICENCE REVIEW

"Other persons" formerly interested parties, such as residents may seek a review of the premises license under one or more of the four licensing objectives.

The licensing authority has a range of powers which it may exercise on determining a review, where it considers them appropriate for the promotion of the licensing objectives.

- Issue informal warning
- Modify conditions of the licence
- Exclude a licensable activity
- To revoke the licence

Where responsible authorities such as environmental health have already issued a warning requiring improvement, that have failed as part of their own stepped approach to address concerns, licensing authorities should not merely repeat that approach and should take this into account when considering what further action is appropriate.

Remedial action should be directed at the cause of the failure to comply with the objectives and should be no more than an appropriate and proportionate response.

7.2. LOCAL AUTHORITY ACTION

The Local Authority also undertook monitoring during the event and it is assumed that they will have measured MNL's which exceeded the condition requirement. They therefore have the power to take formal action for a breach of the Premises Licence condition and /or to call a premises licence review. The range of exceedance is significant in terms of level and time and therefore there would be little doubt that there was an absolute breach of condition.

7.3. PROPOSED CONDITIONS

It is recommended that other parties or responsible authorities apply to review the licence, and amend the licence conditions to include the following.

7.4. ACOUSTIC CONSULTANT

The licence holder shall appoint a suitably qualified and experienced noise control consultant, no later than 3 months prior to the event. The noise control consultant shall liaise between all parties, including the Licence holder, Promoter, sound system supplier, sound engineer and the licensing authority & environmental health department on all matters relating to noise control prior to and during the event.

Rewind.

7.5. NOISE MANAGEMENT

A Noise Management Plan (NMP) shall be submitted to the Licensing Authority at least 2 months prior to the event taking place or as part of the premises licence application. The NMP shall include as a minimum the following information;

- i. The proposed MNL's, and locations
- ii. Music noise times and durations
- iii. Noise check and rehearsal times and durations
- iv. Noise control procedures and MNL monitoring
- v. Complaints monitoring and action
- vi. Compliance report to be submitted to the LA within 14 days of the finish of the event.

7.6. MUSIC NOISE LEVELS

The control limits set at the mixer position shall be adequate to ensure that Music Noise Level (MNL) between 10.00-23.00 shall not at the following representative locations (See attached map for indicative purposes)

- i. Remenham Manor facing onto event arena
- ii. Old School Cottages facing event arena.
- iii. The Reach
- iv. Other to be agreed with the Local Authority

exceed 65dB(A) and 82dB(C) over a 15 minute period throughout the duration of the concert and/or rehearsal or sound check. A proxy position maybe used within an appropriate predicted level.

7.7. SOUND CHECKS & REHEARSALS

Rehearsals and sound checks are permitted only between the following hours:
10.00 hours to 17.00 hours the day before the event takes place

3 hours on performance days

7.8. MUSIC TIMES

Music noise from the event is permitted only between the following hours:
10.00 hours to 23.00 hours

8. HENLEY REGATTA & OTHER COPAS EVENTS – RECOMMENDATIONS

8.1. AMENDED NOSIE MANAGEMENT PLAN

It is recommended that the Copas Partnership provide an amended Noise Management Plan as part of a premises licence minor variation. The amended NMP would include full details of the music control measures that would be undertaken during all events, compliance monitoring and reporting and complaints handling.

8.2. EVENTS DAYS AT 65DB(A)

The Copas Premises Licence and the Rewind Premises Licence allow a total of 9 days at which music noise levels can be at 65dB(A) LAeq,15minute. There is a further condition under the Copas Licence to ensue the MNL on all other event days is no more than 15dB(A) above the background noise level.

The above allocation is in excess of the Code of Practice of Environmental Noise Control from Concerts which sets a threshold number of three events at 65dB(A) for rural venues. The MNL level then decreases to 15dB(A) above background for 4-12 event days.

Although the informal agreement to set aside two events days from the Copas licence for the Rewind Festival has no legal basis it was nevertheless breached in 2012.

It is recommended that this arrangement is formalised to the satisfaction of all parties using a minor variation, such that a maximum number of 6 days at 65dB(A) LAeq,15min should be shared between the Copas Licence and the Rewind licence. ✓

9. OLD BLADES – RECOMMENDATIONS

We recommend that the Old Blades premises licence is amended via a minor variation to ensure that the same requirements for music noise control that the Copas Partnership must adhere to are imposed on Old Blades. ✓

10. CONCLUSION

Three Spires Acoustics have undertaken a music noise compliance assessment of events run by The Copas Partnership & Rewind Festival during the summer season 2012. The Remenham Farm Residents Association is concerned that music noise from events has caused significant disturbance in past years and may not be complying with the Premises Licence Conditions issued by Wokingham Borough Council.

The results of the assessment indicate that music noise from the Henley Regatta and other Copas events were mainly compliant with the premises licence conditions, however the numbers of event days at prescribed Music Noise levels were not in accord with the agreed allowance.

Monitoring of the Rewind Festival indicated that there were significant breaches of the Music Noise Level requirements.

There are also concerns from residents that the Old Blades event is causing significant disturbance and the current conditions are not consistent with other equivalent venues.

Recommendations have been made with regard to future actions that the Residents Association may take in order to reduce the cumulative impact upon Remenham Village residents and to bring a more consistent approach to all the premises licences.

Table 11; Other Public Nuisance Issues reported by Remenham Residents

Resident	Description
Ron Emerson	<p><i>On two occasions I had to stop set up activities that were taking place after hours. The first was on the 26th May at 11-40pm when I had to talk to Tom Copas Jnr about tractors and vehicles creating a lot of noise. His response was simply that they had not finished setting up, but the activity did then cease. The second was much worse. On the 1st June I had to get out of bed at 1-20 am because they were emptying all of the blue refuse bins, many of them filled with bottles that made a horrendous row. They had clearly planned this as the Wilshire refuse company lorries had arrived specifically for this purpose. On this occasion I spoke to Fenella Copas who was to say the least hostile at being challenged on this but again they ceased the activity. Nevertheless this was clearly a deliberate and blatant breach of the licence terms a I pointed out to her.</i></p>
Jon Halsall	<p><i>I am the nearest resident to the Old Blades' site (apart from Peter Sly – the owner) and again UTRC other than the caretaker of Remenham Club. I am one of the founding members of UTRC and use the Club virtually every day. Peter Sly is not only a close friend and neighbour but also a Parish councillor.</i></p> <p><i>Peter Sly had given an undertaking to the Parish council that the footpath Remenham 4 would not be closed. It was, but not only during HRR, but also for several days before and after and was not reopened until the intervention of WBC.</i></p> <p><i>I was stunned by the activities of the common contractor/licensee at Old Blades/UTRC last year. There was a complete disregard of all previous understandings on behaviour and noise. I personally undertook the litter pick at UTRC which amounted to some twenty full bags of rubbish more than a week after HRR. The land and towpath which were used to haul trailers from Old Blades to the road through Upper Thames has yet to be repaired, levelled and reseeded two months after HRR. There were frequent hold ups on Remenham Lane, in the week prior to the Regatta, on Remenham Lane as vehicles parked up waiting to access the Old Blades site.</i></p> <p><i>At Cherwell we were inundated with continuous noise from the Tuesday of Regatta until the Sunday night, when everyone else had gone. It was impossible to sit in our garden throughout HRR week because of the noise from "Maggie's" at Old Blades. My neighbours also complained of the same.. The level of noise at Cherwell was professionally monitored for Friday, Saturday and Sunday; the results were at an unacceptable level. This is more than 200 metres away suggesting that the noise level at source were far above that envisaged by the license, deplorable and well above those of previous years.</i></p>

APPENDIX C – GLOSSARY OF TERMS

The Decibel, dB

The unit used to describe the magnitude of sound is the decibel (dB) and the quantity measured is the sound pressure level. The decibel scale is logarithmic and it ascribes equal values to proportional changes in sound pressure, which is a characteristic of the ear. Use of a logarithmic scale has the added advantage that it compresses the very wide range of sound pressures to which the ear may typically be exposed to a more manageable range of numbers. The threshold of hearing occurs at approximately 0 dB (which corresponds to a reference sound pressure of 2×10^{-5} pascals) and the threshold of pain is around 120 dB. The sound energy radiated by a source can also be expressed in decibels. The sound power is a measure of the total sound energy radiated by a source per second, in watts. The sound power level, L_w is expressed in decibels, referenced to 10-12 watts.

Frequency, Hz

Frequency is analogous to musical pitch. It depends upon the rate of vibration of the air molecules that transmit the sound and is measured as the number of cycles per second or Hertz (Hz). The human ear is sensitive to sound in the range 20 Hz to 20,000 Hz (20 kHz). For acoustic engineering purposes, the frequency range is normally divided up into discrete bands. The most commonly used bands are octave bands, in which the upper limiting frequency for any band is twice the lower limiting frequency, and one-third octave bands, in which each octave band is divided into three. The bands are described by their centre frequency value and the ranges which are typically used for building acoustics purposes are 63 Hz to 4 kHz (octave bands) and 100 Hz to 3150 Hz (one-third octave bands).

A-weighting

The sensitivity of the ear is frequency dependent. Sound level meters are fitted with a weighting network which approximates to this response and allows sound levels to be expressed as an overall single figure value, in dB(A).

Environmental Noise Descriptors

Where noise levels vary with time, it is necessary to express the results of a measurement over a period of time in statistical terms. Some commonly used descriptors follow. $L_{Aeq, T}$ The most widely applicable unit is the equivalent continuous A-weighted sound pressure level ($L_{Aeq, T}$). It is an energy average and is defined as the level of a notional sound which (over a defined period of time, T) would deliver the same A-weighted sound energy as the actual fluctuating sound. LAE Where the overall noise level over a given period is made up of individual noise events, the $L_{Aeq, T}$ can be predicted by measuring the noise of the individual noise events using the sound exposure level, LAE (or SEL or LAX). It is defined as the level that, if maintained constant for a period of one second, would deliver the same A weighted sound energy as the actual noise event. LA1 The level exceeded for 1% of the time is sometimes used to represent typical noise maxima. LA10 The level exceeded for 10% of the time is often used to describe road traffic noise. LA90 The level exceeded for 90% of the time is normally used to describe background noise.

Sound Transmission in the Open Air

Most sources of sound can be characterised as a single point in space. The sound energy radiated is proportional to the surface area of a sphere centred on the point. The area of a sphere is proportional to the square of the radius, so the sound energy is inversely proportional to the square of the radius. This is the inverse square law. In decibel terms, every time the distance from a point source is doubled, the sound pressure level is reduced by 6 dB. Road traffic noise is a notable exception to this rule, as it approximates to a line source, which is represented by the line of the road. The sound energy radiated is inversely proportional to the area of a cylinder centred on the line. In decibel terms, every time the distance from a line source is doubled, the sound pressure level is reduced by 3 dB.

Michael John BEAVIS 32 Spencer Road, Belper, Derbyshire.

PERSONAL LICENCE NUMBER AND ISSUING AUTHORITY OF PERSONAL LICENCE HELD BY DESIGNATED PREMISES SUPERVISOR WHERE THE PREMISES LICENCE AUTHORISES FOR THE SUPPLY OF ALCOHOL

Licence No. 05/01325/PECON Issued by Amber Valley

Date of Issue: 16 June, 2006

J O'Brien
Principal Environmental Health Officer

ANNEXES

Annex 1

Mandatory Conditions

Mandatory Condition - supply of alcohol

- 1) that no supply of alcohol may be made under the premises licence
- (a) at any time when there is no designated premises supervisor in respect of the premises licence, or
- (b) at a time when the designated premises supervisor does not hold a personal licence or his personal licence is suspended; and
- 2) that every supply of alcohol under the premises licence must be made or authorised by a person who holds a personal licence

Mandatory Condition - door supervisors

door supervisors must be licensed by the Security Industry Authority

Note:

This condition does not apply in respect of premises with premises licences authorising plays or films, or in respect of premises in relation to

Premises used exclusively by club with club premises certificate, under a TEN authorising plays or films or under a gaming licence, or Any occasion prescribed by regulations under the Security Industry Act

Annex 2

Conditions consistent with the Operating Schedule

a) General

During trading hours from Wednesday through to Sunday the Personal Licence Holder will have responsibility for the full 30m site. On each 15m site there will be an Event Manager in charge of the day-to-day operation plus an assistant to help.

We have run this event for the last 15 years and have not encountered any complaints with noise or disorder. As far as we are aware we have an unblemished record for this activity at Henley Royal Regatta.

b) Prevention of Crime and Disorder

All necessary precautions will be taken to prevent the following:

1. Cash Till will never be left unattended.
2. Alcohol stock will be kept locked in a secure storage container at all times.
3. Staff will be continually monitoring the public for any excessive drinking within the enclosure and any persons seen to be under the influence will be refused further alcohol on the premises.

c) Public Safety

All necessary precautions will be taken to look after the safety of the public.

Electricity: All electricity sockets will be waterproof. All cabling will be placed beneath the surface of the ground to prevent any accidents.

Sampling: Only 1 alcoholic sample per person will be allowed. The measure of the free sample will be within the legal limit of 25ml.

Crowd monitoring: Event Manager on site will monitor the number of consumers within area to prevent overcrowding. On average the area comfortably holds 100 people at any one time.

Fire: Site is open with a flame retardant canopy over the bar area. There will also be a small covering for the general public to shelter should it rain which will also be flame resistant. In case of fire there will be a fire extinguisher and fire blanket on site at all times.

Evacuation: Should there be a fire the general public can exit through the front of the enclosure plus they can step over the picket fencing which is 1ft high or it can simply be kicked over to allow access from the immediate area.

Rubbish: Bins will be provided at the front of the enclosure onto the towpath for the general public to dispose of plastic sampling cups.

d) Prevention of Public Nuisance

Staff will be continually monitoring the public for any excessive drinking within the enclosure and any persons seen to be under the influence will be refused further alcohol on the premises.

e) Protection of Children from Harm

1. Display notices stating no alcohol to be served to under 18's
2. Proof of age will be required for customers felt to be underage
3. No under 18s allowed within the area

Annex 3

Responsible Authority/Interested Party Conditions - agreed by applicant

ANNEXES continued ...

Thames Valley Police

- 1) During trading hours, a nominated individual with appropriate training and experience can be identified as being responsible for each particular bar area, the person will preferably be a Personal Licence Holder.
- 2) Customers shall be prevented from taking any alcoholic drinks, or other drinks, from the premises in open containers (e.g. glasses and opened bottles).
- 3) A valid proof of age card or UK passport shall be required to be produced by any person appearing to those selling or supplying alcohol, to be under 18 (or 16 in the case of the consumption of beer, wine and cider in the company of adults during a table meal) and who is attempting to buy alcohol
- 4) The management of the premises shall devise and implement a policy (which is approved by Thames Valley Police) to monitor and control the access and exit of young persons possibly underage from the premises.
- 5) The management shall have in place and implement a policy, approved by Thames Valley Police, relating to the prevention of the use of illegal drugs. The policy shall include: detection, confiscation, storage and disposal.
- 6) An entry, closure and dispersal policy, approved by Thames Valley Police, for controlling the opening and closing of the premises and the departure of customers at the conclusion of licensed activities must be put in place and must be actively operated.

Health & Safety

- All electrics must be installed safely and be suitable for the environment. If applicable, at all events to which there is an element of 'employment' a current certificate of electrical safety in a form prescribed in the Institute of Electrical Engineers Wiring Regulations, signed by a competent person, should be obtained for the electrical installation in connection with the licence (fixed and temporary structures).
- Where applicable, at all events to which there is an element of 'employment' a current certificate of gas safety signed by a person competent under CORGI, should be obtained for the gas installation in connection with the licence (for fixed and temporary supplies).
- Arrangements should be made for the first aid treatment of members of the public who are attending events in connection with your licence.
- A current certificate showing that all canopy/ marquee materials and all hangings used in connection and any soft furnishings used are of durably flame retarded fabric or inherently flame-retarded fabric and a certificate should be provided, signed by a competent person, for all such structures erected in connection with your licence.

Interested Party

1. Noise

Noise levels should not exceed 55 db(A) measured over a fifteen minute period one metre from the façade of any noise sensitive premises (particularly the dwelling of any parishioner) with windows open in a typical manner for ventilation between the hours of 9.00 am and the hours above (Monday to Thursday 11.00 pm ; Sunday 10.30 pm ; Friday and Saturday 12.00 am - 24.00) and from these hours to 9.00 am the noise level should not be audible one metre from the façade of any noise sensitive premises (particularly the dwelling of any parishioner) with windows open in a typical manner for ventilation. A noise sensitive premise includes premises used for residential purposes, hospitals and similar institutions, educational establishments (when in use) or places of worship (during recognised times and days of worship) or any premises used for any purposes likely to be affected by the noise.

2. Fireworks

There should be no fireworks after Monday to Thursday 10.00 pm, Friday and Saturday 11.00 pm and Sunday 9.30pm

3. Traffic

Where there is likely to be significant generation of traffic, or traffic in unsocial hours (defined as after 10.30 pm on Sunday, 11.00 pm on Monday to Thursday or 12.00 pm on Friday and Saturday) the licensee must evidence that the license has appropriate measures to minimise the effect of this on the parishioners.

4. Rubbish

The Licensee clears the site every Sunday evening of all rubbish, paper, cups, and any other mess restoring the field to a pristine condition. The towpath, river and adjoining area should also be left clean.

Fire Authority - advise

The occupancy capacity within the licensed area should be a maximum of 100 persons

Annex 4

Review of Licence

Land adjacent to the Upper Thames Rowing Club Licence Ref: PRO 255 (Cord Promotions)

List of proposed amendments to 'Public Nuisance' related conditions

Delete following existing condition within Annex 2 d) Prevention of Public Nuisance

Staff will continually monitor the public for any excessive drinking within the enclosure and any persons seen to be under the influence will be refused further alcohol on the premises

N.B You may wish to consider moving this condition to a more appropriate location within the licence document (e.g.Prevention of Crime and Disorder)

Delete the following existing conditions:

Interested Party

1) Noise

Noise levels should not exceed 55dB(A).....or any premises used for any purposes likely to be affected by the noise."

4) Rubbish

The licensee clears the site every Sunday evening of all rubbish.....The towpath, river and adjoining area should also be left clean

Insert the following new conditions:

1) During Henley Royal Regatta all amplified speech, amplified music or amplified sound emitted from the premises shall not be audible within the nearest noise sensitive premises with the windows open in a manner typical for ventilation before 11:00 hours or after 23:00 hours from Monday to Saturday and before 11:00 hours or after 16:00 hours on Sunday.

Noise Limit

2) During Henley Royal Regatta the music noise level (MNL, (L_{Aeq})) when measured at one metre from the nearest noise sensitive dwelling between 11:00 hours and 23:00 hours Monday to Saturday, and between 11:00 hours and 16:00 hours on Sunday, shall not exceed the background noise level by more than 12dB(A) measured over a 15 minute period.

Informative

It is recognised that the licence holder may not always have access to the façade of the nearest noise sensitive dwelling in order to carry out compliance noise monitoring. The licence holder may, therefore, wish to establish each

year by calculation, with the agreement of the Licensing Authority, a Music Noise Level at a free field proxy monitoring location close to the boundary of the licensed premises.

Establishing Background Noise Level

3) At least four weeks prior to events taking place during the Henley Royal Regatta the licence holder will carry out a background noise survey over a 24 hour period. The background noise level to be determined at the boundary of the licensed premises located closest to the nearest noise sensitive property.

The results of the background survey will be submitted to the Licensing Authority for agreement, with the lowest background noise level being used to determine the music noise level (background noise level plus 12dBA). Alternatively, with the agreement of the Licensing Authority, the licence holder may establish music noise levels for different periods of the day and evening dependant upon any significant variation in the background noise level measured throughout the day and evening.

The licence holder will agree both the measured background level(s) and derived music noise level(s) with the Licensing Authority by written agreement at least three weeks prior to the event.

N.B. The background shall be taken as the prevailing sound level at the location, measured in terms of $L_{A90,T}$ on an equivalent day and at an equivalent time when no events or sound checks are taking place)

Setting up and Dismantling

4) For activities arising from and in connection with the setting up and dismantling of temporary structures, plus the delivering and assembling of equipment within the premises and similar associated activities, the noise shall be adequately controlled to ensure that, so far as is reasonably practicable, no undue noise disturbance is caused to the occupiers of residential premises in the vicinity. Such activities shall not take place earlier than 0800 or later than 2200. Noisy activity outside these times will only be permitted in the event of an unforeseen emergency

The noise to be controlled shall include the warning alarm emitted from reversing vehicles. All vehicles, where possible, shall be fitted with 'white noise' (broadband sound) reversing alarms. If vehicles have not been fitted with white noise reversing alarms then reversing alarms shall be disabled and a banksman will be tasked with supervising and ensuring the safety of all reversing manoeuvres.

Noise Management Plan

5) At least 3 months prior to the events a detailed noise management plan (NMP) shall be prepared and submitted for written approval to the Licensing Authority. The NMP will include, as a minimum, the following information::

- i) The Music Noise Level (MNL) limit as agreed prior to the event with the Licensing Authority including the derived MNL limit at any agreed proxy monitoring location(s).
- ii) Music noise times including times when noise checks and rehearsals will take place.
- iii) Noise control procedures including details of monitoring of the MNL
- iv) Procedure for responding to and dealing with complaints received during the event
- v) Details of liaison with the neighbouring Licence Holder
- vi) Details of noise mitigation measures to be used including, for example, any noise limiting devices that may be used and any acoustic screening that may be erected
- vii) A list of all amplification equipment and their rating in terms of wattage
- viii) Details of communications between staff monitoring noise on and off site and with the neighbouring licence holder.
- ix) Contact details of the designated premises supervisor and other staff or contractor responsible for the control of noise during the event.
- x) A designated contact telephone number that can be used by local residents to lodge complaints during the event.

Acoustic Consultant

6) The licence holder will engage suitably experienced and suitably qualified persons to monitor and manage noise during the events in accordance with the agreed noise management plan.

Compliance Report

7) The licence holder will provide to the Licensing Authority a report summarising the outcome and results of noise monitoring of events that have taken place that year within four weeks of the final event of the calendar year. This report will also be provided to any other interested party upon request.

Review of NMP

8) The licence holder shall review the noise management plan each year to consider any noise related issues that may have arisen during any event and any complaints received. Where necessary amendments shall be made to the plan that take into account the findings of each review and ensure that the issues, where necessary, are addressed and do not recur. The revised management plan will be submitted each year in accordance with condition 5 above

Control of Litter

9) The applicant will arrange for litter picking to take place during and following each day's event. Litter will be cleared from within the curtilage of the licensed premises and in immediate vicinity of the licensed premises. An adequate number of litter bins shall be provided and they shall be emptied regularly to ensure that they do not overflow.

JPD v. 1 6/12/12

Thames Valley Police as a responsible authority under the Licensing Act 2003 wish to make representations in respect of the review of Premise licence Numbers PRO256 and PR0255 (the Land Adjacent to Upper Thames Rowing Club) and PR0288 (Old Blades Garden) following concerns about the general day to day running by the management during the Henley Royal Regatta on Friday and Saturday 29th and 30th June 2012 this, despite a meeting with the management on Saturday 30th June 2012.

Under the Crime and Disorder Objective contained in the Licensing Act 2003 (The Act) Thames Valley Police make the following representations and request the following changes and additions to the licence conditions

Remove Annex 2b as stated in the operating schedule.

Reason: It is not clearly defined, thus not enforceable. For example 15 members on site (what members). The age policy is now in statute written onto the Licensing Act.

Replace with: The premise licence holder shall ensure, whilst the premise are open for the sale of alcohol, the Designated Premise Supervisor or a personal Licence Holder shall be available on the premise.

Amendment of Annex 2 Conditions consistent with the Operating Schedule:

- (a) the last line reads: "A Management Policy will be in place in relation to the Henley Royal Regatta".

In order to update this condition and make it enforceable I propose the following amendment to the wording of this condition to read:

The premise licence holder shall prepare an Event Management Plan for each Royal Regatta, setting out how the event will be managed and the precautions which have been taken to cater for all reasonably foreseeable contingencies, and which will demonstrate the procedures, roles and specific responsibilities of the management team, security and associated personal. The finalised version of such a plan must be submitted to and approved by the Licensing Authority no later than 3 months prior to commencement of the Royal Regatta in the present year.

Annex 3. 2) Reads:

An adequate number of Security Industry Authority (S.I.A.) licensed door supervisors, must be provided whenever regulated entertainment takes place. These licensed door supervisors shall be solely employed for vetting, regulating, controlling and supervising patrons whilst entering and whilst on the premises and to ensure the maintenance of good order, public safety and internal security.

Amend to read:

The minimum number of Security Industry Authority (S.I.A.) licensed door supervisors shall be provided whenever alcohol is served and live amplified music takes place at a ratio of at least one SIA member of the Door Staff for every 75 patrons. The licensed door supervisors shall be solely employed for vetting, regulating, controlling and supervising patrons whilst entering and

whilst on the premises and to ensure the maintenance of good order, public safety and internal security.

Annex 3 item 4 – The word District is amended to read “Borough”

Plus the addition of the following new conditions

Fencing:

The premises licence holder shall ensure, whenever then premises are open to the public during the Henley Royal Regatta between the hours of 18.00 hrs and the last customer has left the licensed premises after closing time the following day, a system of barrier and or fencing is erected and capable of providing perimeter security in order to control the ingress egress of patrons.

Maximum Capacity for Crowd Control:

The premise licence holder shall have the maximum capacity of the premises shall be determined by a written risk assessment carried out by a competent person or suitable qualified person.

Personal Safety and Incident Recording:

The premises licence holder shall ensure that all drinks are decanted and served in vessels made of plastic or toughened glass.

All incidents which impact on any of the four licensing objectives shall be recorded in a register kept at the premises for this purpose. The names of the person recording the incident and those members of staff who deal with the incident shall also be recorded. Where known, any offenders name shall also be recorded.

Staff Training and Briefings:

In the absence of the Designated Premises Supervisor, a personal licence holder shall be on the premise to authorise any sale of alcohol.

The Premises Licence Holder shall ensure staff briefings and other information obtained from Licensing Bodies for the Royal Regatta is provided for staff at the commencement of each daily shift. Briefings shall include:

- The Management Structure,
- Evacuation procedures;
- Basic licensing laws (no sale of alcohol to persons under 18 years, not selling alcohol to drunken persons etc);
- Health and Safety Procedures including Fire Safety Equipment.

Lighting:

The premises licence holder shall ensure a system of festoon lighting be installed in order to illuminate the area between the length of the perimeter boundary fencing nearest the River Thames and the edge of the River Thames. The lighting is to be maintained

in a good and efficient working order at all times during dusk and night time until the area is clear of patrons.

Subject: RE: Proposed review of Licence - Land Adjacent to Upper Thames Rowing Club
Attachments: Draft Conditions RJG edit.doc; PRO 255 proposed conditions.doc

Dear Jo

I have reviewed the draft conditions below and the attached proposal affecting Cord along with those affecting the other parties below, and agree with them.

PRO255 – Land Adjacent to Upper Thames Rowing Club (Cord Promotions)
PRO 256 – Land adjacent to Upper Thames Rowing Club (Upper Thames Rowing Club)
PRO 288 – Old Blades (Garden)

We have no difficulty in adhering to them in principal as we prefer the way the sites were previously operated with a minimum of disruption to those in the vicinity. I believe the ambiance should be more in line with Stewards allowing those unable to gain access to enjoy relaxed and genteel surroundings.

In terms of music we have in the past only used acoustic music or a string quartet to set a tranquil tone where those promenading can enjoy a break from their routine and enjoy the view of the river in a relaxed atmosphere.

I would welcome a return to this way of operating as was the case some years ago

If there is any further information that you require please do not hesitate to contact me.

With kind regards

Stuart Gensian
