

WHB Priority	Proposed KPI	Data source	Frequency	Purpose
1. Enabling and empowering resilient communities	1.1 - Population with a long-term condition who manage from home	Wokingham CCG (FYFV, live well, age well and die well)	Annually	It is directly linked to services empowering resilience in older population with a long-term condition
	1.2 - Emergency admissions for hip fractures in 65+	PHOF	Annually	Older people require integrated care services in order to be more resilient and avoid hospitalisation
	1.3 - People who are readmitted to hospital due to an emergency with 30 days of discharge (per 100,000)	Wokingham CCG	Annually	It is a measure of service quality and need
	1.4 - Population aged 65+ who are still at home 91 days after discharge from hospital following use of reablement and rehabilitation services (%)	Wokingham CCG	Annually	It is a measure of service quality and need
	1.5 - Emergency admissions in people over 65	Wokingham CCG	Annually	Older people who are do not have emergency admissions are healthier and more resilient
	1.6 - People aged 65+ who have injuries due to falls (per 100,000)	Wokingham CCG; POPPI	Annually; Quarterly	It is directly linked to services enabling the older population to have a better quality of living.
2. Promoting and supporting good mental health	2.1 - Self-reported wellbeing	PHOF; ONS	Annually	It is a measure of overall wellbeing in the community
	2.2 - Prevalence (%) of Mental Health illness (registered and estimated)	QoF; POPPI; PANSI	Annually	It is a measure of service need
	2.3 - Prevalence (%) of Dementia (registered and estimated)	QoF; POPPI	Annually	It is a measure of service need
	2.4 - Suicide rate per 100,000	PHOF	Annually	People with undiagnosed and untreated mental health problems are more likely to commit suicide
	2.5 - Emergency Hospital Admissions for Intentional Self-Harm	PHOF	Annually	People with undiagnosed and untreated mental health problems are more likely to commit self-harm
	2.6 - Entering CAMHS & IAPT treatment: rate per 100,000 population	PHE; NHS Digital	Quarterly	Access to mental health services for those who need them is crucial in preventing deterioration of mental wellbeing and in treating people with mental health conditions.
	2.7 - Completion of CAMHS & IAPT treatment: rate per 100,000 population	PHE; NHS Digital	Quarterly	Successful completion of treatment is pivotal for people with mental health issues in order to manage and treat their condition. It is also an indication of service quality
	3.1 - Unemployment rate in population of working age (%)	ONS	Quarterly	Unemployment is a wider determinant of health. It is linked with deprivation, poor housing, and with poor health and wellbeing.
	3.2 - Estimates of the prevalence of opiate and crack cocaine use	National Treatment Agency for Substance Misuse	Annually	Substance misuse is directly linked to poor physical and mental health and premature mortality. It also has a socio-economic impact
	3.10 - Adults drinking over 14 units of alcohol a week (%)	LAPE; Local Survey (SOAs)	Annually	Alcohol misuse is directly linked to liver disease, premature mortality, and poor mental and physical health. It also has a socio-economic impact
	3.11 - Adult physical inactivity (%)	PHOF; Local Survey (SOAs)	Annually	Physical inactivity is one of the main causes of unhealthy weight, and poor physical and mental health

3. Reducing health inequalities	3.12 - Average number of portions of fruit consumed daily (adults)	PHOF; Local Survey (SOAs)	Annually	Diet is one of the main causes of unhealthy weight, and poor physical and mental health
	3.13 - Breastfeeding prevalence at 6-8 weeks after birth (%)	PHOF	Annually	Breastfeeding is associated with many health benefits
	3.14 - School Readiness: the percentage of children achieving a good level of development at the end of reception	PHOF	Annually	It is a measure of children healthy development
	3.3 - Looked after children	PHOF	Quarterly	These children require special services and are more likely to have poor physical and mental health later in life
	3.4 - Overweight and obese school children in Reception (%)	NCMP	Annually	Unhealthy weight is directly linked to poor diet and physical exercise. It can lead to poor health and child development, and can also cause mental health problems
	3.5 - Overweight and obese school children in Year 6 (%)	NCMP	Annually	Unhealthy weight is directly linked to poor diet and physical exercise. It can lead to poor health and child development, and can also cause mental health problems
	3.6 - Obesity prevalence in adults (%)	QoF; Local Survey (SOAs)	Annually	Obesity is linked to diabetes, cardiovascular disease and poor physical and mental wellbeing
	3.7 - Smoking prevalence in adults (%)	PHOF; Local Survey (SOAs)	Annually	Smoking is associated with poor physical and mental health, lung cancer, PODP, CVD, alcohol and substance misuse, deprivation and premature mortality
	3.8 - Smoking prevalence in children (%)	PHOF; Local Survey (SOAs)	Annually	Smoking is associated with poor physical and mental health, lung cancer, cardiovascular and respiratory disease, alcohol and substance misuse, deprivation and premature mortality
	3.9 - Smoking at time of delivery (%)	PHOF	Annually	Smoking will have a negative impact on the baby's health and development
4. Delivering person-centred integrated services	4.1 - Adult social care users who have as much social contact as they would like (% of adult social care users)	ASCOP	Annually	There is a clear link between loneliness and poor mental and physical health. This measure draws on self-reported levels of social contact as an indicator of social isolation for service users and carers.
	4.2 - Delayed transfers of care from hospitals (per 100,000 population; avrg number of days per month)	Wokingham CCG; NHS Digital	Annually	It is directly linked to quality of services
	4.3 - NHS Health Checks (%uptake, %offered)	GP Practices	Annually	NHS Health Checks can help to prevent poor health and wellbeing, hospitalisation, premature mortality, and improve resilience
	4.4 - Proportion of patients satisfied with support to manage long-term health conditions	WBC	Annually	It is a measure of service quality
	4.5 - Average clients per carer	WBC	Annually	It is a measure of service quality and need
	4.6 - GP referrals (diet, exercise)	GP Practices	Annually	Diet and exercise are directly linked to physical and mental health
