

11. STATEMENT OF ACCOUNTING POLICIES

The statement of accounts summarises the Council's transactions for the 2017/18 financial year and its position at the year end of 31 March 2018. The Council is required to prepare an annual statement of accounts by the Accounts and Audit Regulations 2015, which those regulations require to be prepared in accordance with proper accounting practices.

This statement of accounts summarises the Council's and group transactions for the 2017/18 financial year and its position at the year end of 31 March 2018. It has been prepared in accordance with the CIPFA Code of Practice on Local Authority Accounting in the United Kingdom (the Code) 2017/18. The statements comply with the CIPFA Service Reporting Code of Practice 2017/18 (SeRCOP), supported by International Financial Reporting Standards (IFRS) and have been produced in accordance with the statutory framework established by sections 3 and 20 of the Local Audit and Accountability Act 2014.

The accounting convention adopted in the statement of accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

The single entity financial statements are also defined as including the income, expenditure, assets, liabilities, reserves and cash flows of the local authority maintained schools within the control of the local authority. Local authority maintained schools are those schools categorised in the School Standards and Framework Act 1998, i.e. community, voluntary controlled, voluntary aided, foundation, community special, foundation special and nursery schools.

The statements reflect the requirements of International Financial Reporting Standards (IFRS) by adopting the core accounting principles and concepts of:

- **Accruals basis** – other than the Cash Flow Statement, the financial statements have been prepared on an accruals basis and report transactions that have been recorded in the accounting period for which the goods and services were received or supplied rather than in which the cash was received or paid
- **Going concern** – the financial statements have been prepared on the assumption that the Council will continue in operational existence for the foreseeable future
- **Understandability** – the statements have been prepared to ensure they are as easy to understand as possible
- **Relevance** – the financial statements provide information about the Council's performance and position that is useful to the users of the accounts to assess the stewardship of public funds and for making economic decisions
- **Reliability** – the financial information faithfully represents the substance of the transactions, the activities underlying them and other events that have taken place, are free from deliberate or systematic bias and material error, are complete within the bounds of materiality and cost and have been prudently prepared
- **Comparability** – the information has been prepared consistently and with adequate disclosures so that it can be compared with prior years and other local authorities
- **Materiality** – the statements disclose items of a certain size and nature such that they provide a fair presentation of the financial position and transactions of the Council

- **Legality** – where the accounting principles and specific legislation requirements are in conflict, the financial statements have been prepared to reflect legislative requirements

Where the Council is acting as an agent for another party (e.g., in the collection of business rates and council tax), income and expenditure are recognised only to the extent that commission is receivable by the Council for the agency services or the Council incurs expenses directly on its own behalf in rendering the services.

1. Accruals of Income and Expenditure

Activity is accounted for in the year that it takes place and when a right to consideration exists, not simply when cash payments are made or received. In particular:

- Fees, charges and rents due from customers are accounted for as income at the date the Council provides the relevant goods or services
- Supplies and services are recorded as expenditure when they are consumed – where there is a gap between the date supplies are received and their consumption, they are carried as stocks on the Balance Sheet
- Works are charged as expenditure when they are completed, before which they are carried as works in progress on the Balance Sheet
- Interest payable on borrowings and receivable on investments is accounted for on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract.
- Where income and expenditure has been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where it is doubtful that debts will be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected
- Where payments are made or received in advance of a service being provided or received a payment or receipt in advance is recognised as a debtor or creditor in the Balance Sheet
- Income and expenditure are credited and debited to the relevant revenue account, unless they properly represent capital receipts or capital expenditure

2. Acquired Operations

The Council did not have any acquired operations in the 2017/18 financial year.

3. Discontinued Operations

The Council did not have any discontinued operations in the 2017/18 financial year.

4. Cash and Cash Equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of less than 24 hours.

Cash equivalents are highly liquid investments that mature in 3 months or less from the date of acquisition and that are readily convertible to known amounts of cash with little risk of change in value.

5. Exceptional Items

When items of income and expense are material, their nature and amount is disclosed separately, either on the face of the Comprehensive Income and Expenditure Statement or in the notes to the

accounts, depending on how significant the items are to an understanding of the Council's financial performance.

6. Prior period adjustments, changes in accounting policies and estimates and errors

Adjustments applicable to prior years arising from changes in accounting policies are accounted for by restating the comparative figures for the preceding period and by adjusting opening balances as if the new policy had always been applied.

Changes in accounting estimates are accounted for in the current and future years affected by the change but do not give rise to a prior year adjustment.

Material errors are corrected retrospectively by restating the comparative figures for the preceding period and by adjusting the opening balances.

7. Charges to revenue for non-current assets

General fund service revenue accounts, central support services and trading accounts are charged with the following amounts to record the cost of holding fixed assets during the year:

- depreciation attributable to the assets used by the relevant service
- revaluation and impairment losses on assets used by the service where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off
- amortisation of intangible fixed assets attributable to the service

The Council is not required to raise council tax to fund depreciation, revaluation and impairment losses or amortisations. However it is required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement. Depreciation, revaluation and impairment losses and amortisations are therefore replaced by the contribution in the general fund balance by way of an adjusting transaction with the capital adjustment account in the Movement in Reserves Statement for the difference between the two.

8. Employee benefits

i. Benefits payable during employment

Short term employee benefits are those to be settled within 12 months of the year end, for example wages and salaries, paid annual and sick leave, bonuses and non-monetary benefits such as cars. They are charged to the accounts in the period within which the employees worked. An accrual is made for the cost of any leave earned but not taken before the year end and which can be carried forward by the employee into the next financial year. The accrual is made at the wages and salaries rate in the new financial year as that will be when the employee will benefit. The charge is made to the surplus or deficit on the provision of services in the Comprehensive Income and Expenditure statement and then reversed out by a credit to the accumulating compensated absences adjustment account through the Movement in Reserves Statement, allowing the benefit to be charged to revenue when the leave occurs.

ii. Termination benefits

Amounts payable as a result of a decision by the Council to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy are charged on an accruals basis to the relevant line in the Comprehensive Income and Expenditure Statement.

Termination benefits involving pension enhancement are required by statutory provisions to be charged to the general fund balance on the basis of the amount payable by the Council to the pension fund or the pensioner in the year not the amount calculated according to relevant accounting standards.

Appropriations are required to and from the pensions reserve in the Movement in Reserves Statement to remove the notional debits and credits for pension enhancement termination benefits and to replace them with debits for the cash paid to the pension fund, the pensioners and any amounts payable but unpaid at the year end.

iii. **Post-employment benefits**

Employees of the Council are members of two separate pension schemes:

- The Teacher's Pension Scheme, administered by Capita Teachers' Pensions on behalf of the Department for Education (DfE)
- The Local Government Pension Scheme, administered by the Royal Borough of Windsor and Maidenhead Council

Both schemes provide defined benefits to members (retirement lump sums and pensions), earned as employees work for the Council.

The arrangements for the teacher's scheme mean that liabilities for these benefits cannot be specifically identified to the Council. The scheme is therefore accounted for as if it were a defined contributions scheme with no liability for future payments of benefits recognised in the Balance Sheet. The People's services – school block line in the Comprehensive Income and Expenditure Statement is charged with the employer's contributions payable to Teachers Pensions in the year.

Local Government Pension Scheme

The Local Government Pension Scheme provides members of the scheme with defined benefits related to pay and service. The level of the employer's contribution is determined by triennial actuarial valuation. The latest review was undertaken as at 31 March 2016. Under Superannuation Regulations, the contribution rates are set to meet all the liabilities of the fund.

The Balance Sheet includes a pension reserve which includes the attributable share of the funds, assets and liabilities that relate to the Council. Employer contributions will be adjusted in future years to account for any projected deficit.

The liabilities of the pension scheme attributable to the Council are included in the Balance Sheet on an actuarial basis using the projected unit method – i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions about mortality rates, employee turnover rates, etc., and projections of projected earnings for current employees.

Liabilities are discounted to their value at current prices, using a discount rate of 3.7% (based on the annualised yield at the 20 year point on the Merrill Lynch AA rated corporate bond curve, which has been chosen to meet the requirements of IAS 19 and with consideration of the duration of the employer's liabilities. This is consistent with the approach used at the previous accounting date).

The assets of the pension fund attributable to the Council are included in the Balance Sheet at their fair value:

- quoted securities – current bid price
- unquoted securities – professional estimate
- unitised securities – current bid price
- property – market value

The valuation of quoted securities for the pension scheme is based on bid price rather than mid-market value.

The change in the net pension liability is analysed into the following components:

Service cost comprising:

- current service cost – the increase in liabilities as result of years of service earned this year is allocated in the Comprehensive Income and Expenditure Statement to the revenue accounts of the services for which the employees worked.
- past service cost – the increase in liabilities as a result of a scheme amendment or curtailment whose effect relates to years of service earned in earlier years – charged to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement on the relevant line.
- net interest on the net defined liability i.e. net interest expense for the authority – the change during the period in the net defined liability that arises from the passage of time charged to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. This is calculated by applying the discount rate used to measure the defined benefit obligation at the beginning of the period to the net defined liability at the beginning of the period, taking into account any changes in the net defined liability during the period as a result of contribution and benefit payments.

Re-measurement comprising:

- the return on plan assets – excluding amounts included in net interest on the net defined liability – charged to the pensions reserve as other comprehensive income and expenditure.
- Actuarial gains and losses – changes in the net pensions liability that arise because events have not coincided with assumptions made in the last actuarial valuation or because the actuaries have updated their assumptions – charged to the pensions reserve as other comprehensive income and expenditure.

Contributions paid to the Berkshire County Council Pension Scheme – cash paid as employer's contributions to the pension fund in settlement of liabilities is not accounted for as an expense.

In relation to retirement benefits, statutory provisions require the general fund balance to be charged with the amount payable by the Council to the pension fund or directly to pensioners in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, this means that there are appropriations to and from the pensions reserve to remove the notional debits and credits for retirement benefits and replace them with debits for the cash paid to the pension fund, pensioners and any amounts payable to the fund but unpaid at the year-end. The negative balance that arises on the pension reserve thereby measures the beneficial impact to the general fund of being required to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

Discretionary benefits

The Council has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff (including teachers) are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the Local Government Pension Scheme.

Details of the methods adopted in the valuation of scheme assets and liabilities are set out in the notes to the Balance Sheet.

9. Events after the balance sheet date

These are events both favourable and unfavourable, which occur between the end of the Balance Sheet date and the date when the Statement of Accounts is authorised for issue:

- **Adjusting Event**

The Statement of Accounts is adjusted to reflect events where there is evidence that conditions existed at the Balance Sheet date

- **Non-Adjusting Event**

Where an event is indicative of conditions that arose after the Balance Sheet date, the Statement of Accounts are not adjusted. However, the following will be disclosed for each material category of non-adjusting event:

- the nature of the event, and
- an estimate of the financial effect, or a statement that such an estimate cannot be made reliably.

The date when the Statement of Accounts was authorised for issue and who gave the authorisation is disclosed in the notes to the accounts.

10. Financial Instruments

i. Financial Liabilities

Financial liabilities are initially measured at fair value and carried at their amortised cost. Annual charges to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument. The effective interest rate is the rate that exactly discounts estimated future cash payments over the life of the instrument to the amount at which it was originally recognised.

For most of the borrowings that the Council has, this means that the amount presented in the Balance Sheet is the outstanding principal repayable (plus accrued interest) and interest charged to the Comprehensive Income and Expenditure Statement is the amount payable for the year according to the loan agreement.

The Council does not issue bonds.

Gains and losses on the repurchase or early settlement of borrowing are credited and debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement in the year of repurchase / settlement. However, where repurchase has taken place as part of a restructuring of the loan portfolio that involves the modification or exchange of existing instruments, the premium or discount is respectively deducted from or added to the amortised cost of the new or modified loan and the write-down to the Comprehensive Income and Expenditure Statement is spread over the life of the loan by an adjustment to the effective interest rate.

Where premiums and discounts have been charged to the Comprehensive Income and Expenditure Statement, regulations allow the impact on the General Fund Balance to be spread over future years. The Council has a policy of spreading the gain or loss over the term that was remaining on the loan against which the premium was payable or discount receivable when it was repaid. The reconciliation of amounts charged to the Comprehensive Income and Expenditure Statement to the net charge required against the General Fund Balance is managed by a transfer to or from the Financial Instruments Adjustment Account in the Movement in Reserves Statement.

ii. Financial Assets

Financial assets are classified into two types:

- loans and receivables – assets that have fixed or determinable payments but are not quoted in an active market
- available-for-sale assets – assets that have a quoted market price and / or do not have fixed or determinable payment

a. Loans and Receivables

Loans and receivables are initially measured at fair value and are subsequently carried at their amortised cost. Annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the loans that the Council has made, this means that the amount presented in the Balance Sheet is the outstanding principal receivable (plus accrued interest) and interest credited to the Comprehensive Income and Expenditure Statement is the amount receivable for the year in the loan agreement.

Any gains and losses that arise on the de-recognition of the asset are credited / debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Sometimes the Council may make loans at less than market rates. These are called soft loans. Due to the low value of advances made which may be considered as soft loans, the Council applies de minimis principles to soft loans.

b. Available for Sale Assets

Available-for-sale assets are initially measured and carried at fair value. Where the asset has fixed or determinable payments, annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the amortised cost of the asset multiplied by the effective rate of interest for the instrument. Where there are no fixed or determinable payments, income (e.g., dividends) is credited to the Comprehensive Income and Expenditure Statement when it becomes receivable by the Council.

Assets are maintained in the Balance Sheet at fair value. Values are based on the following principles:

- instruments with quoted market prices – the market price
- other instruments with fixed and determinable payments – discounted cash flow analysis
- equity shares with no quoted market prices – independent appraisal of company valuations.

Changes in fair value are balanced by an entry in the Available-for-Sale Reserve and the gain / loss is recognised in the Surplus or Deficit on Revaluation of Available-for-Sale Financial Assets. The exception is where impairment losses have been incurred – these are debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement, along with any net gain or loss for the asset accumulated in the Available-for-Sale Reserve.

Where assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made (fixed or determinable payments) or fair value falls below cost, the asset is written down and a charge made to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. If the asset has fixed or determinable payments, the impairment loss is measured as the difference between the carrying amount and the present value of the revised future cash flows discounted at the asset's original effective

interest rate. Otherwise the impairment loss is measured as any shortfall of fair value against the acquisition cost of the instrument (net of any principal repayment and amortisation).

Any gains and losses that arise on the de-recognition of the asset are credited or debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement, along with any accumulated gains or losses previously recognised in the Available-for-Sale Reserve.

Where fair value cannot be measured reliably, the instrument is carried at cost (less any impairment losses).

11. Foreign Currency Translation

Income and expenditure arising from a transaction denominated in a foreign currency is translated into £ sterling at the exchange rate in operation on the date on which the transaction occurred. If the rates do not fluctuate significantly, an average rate for a period is used as an approximation. Where the transaction is to be settled at a contracted rate, that rate is used.

At each Balance Sheet date, monetary assets and liabilities denominated in a foreign currency are reconverted at the spot exchange rate at 31 March or, where appropriate, the rates of exchange fixed under the terms of the relevant transactions. Resulting gains or losses are recognised in the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

12. Government Grants and Contributions

Whatever their basis of payment, government grants and other contributions or donations are accounted for on an accruals basis. They are recognised on the relevant service line or the Taxation and Non-Specific Grant Income line in the Comprehensive Income and Expenditure Statement once the conditions for their receipt have been complied with and there is reasonable assurance that the grant or contribution will be received. Where conditions have not been satisfied, the grant or contribution is carried in the Balance Sheet as a creditor.

Capital grants credited to the Comprehensive Income and Expenditure Statement are reversed out of the General Fund Balance in the Movement in Reserves Statement. Grants which have not yet been used to finance capital expenditure are posted to the Capital Grants Unapplied reserve. When an amount in the Grants Unapplied Reserve is applied to fund capital expenditure, it is posted to the Capital Adjustment Account. There is no deferral of grant expenditure to match against the depreciation of the underlying asset the grant was used for.

Donated assets transferred to the Council for nil consideration are recognised at fair value in the Comprehensive Income and Expenditure Statement once any conditions attaching to them have been met.

13. Intangible Assets

Intangible assets are non-monetary assets without physical substance which are capable of being sold separately from the rest of the Council's business or which arise from contractual or other legal rights. They are recognised where they have a cost in excess of £10,000, where it is probable that future economic benefits will flow to, or service potential be provided to, the Council and where the cost of the asset can be measured reliably. Where internally generated assets are held for service potential, this involves a direct contribution to the delivery of services to the public.

Internally generated assets are capitalised only where all of the following can be demonstrated by the Council:

- technical feasibility of completing the asset so it will be available for use or sale;
- intention to complete the asset;
- ability to use or sell the asset;
- how the asset will generate future economic or service delivery benefits (by demonstrating a market for the asset or the usefulness of the asset);
- availability of adequate resources are to complete the asset; and
- ability to measure reliably the expenses attributable to the asset during the development phase only (research expenditure cannot be capitalised)

Software which is integral to the operation of hardware (e.g. an operating system) is capitalised as part of the relevant item of property, plant and equipment. Software which is not integral to the operation of hardware (e.g. application software licences), is capitalised when it is expected that future economic benefits or service potential will flow from the intangible asset to the Council.

Expenditure on the development of websites is not capitalised if the website is solely or primarily intended to promote or advertise the Council's goods and services and does not assist in the provision of effective services or generate an economic benefit.

Intangible assets are recognised initially at cost, comprising all directly attributable costs needed to create, produce and prepare the asset to the point that it is capable of operating in the manner intended by management. Subsequently intangible assets should be recognised at fair value measured by reference to an active market. However, the types of intangible assets held by the Council are very unlikely to have readily ascertainable active market values so they are carried at amortised cost. The depreciable amount of an intangible asset is amortised over its useful life to the relevant service line(s) in the Comprehensive Income and Expenditure Statement. The useful economic lives of intangible assets disclosed in the Balance Sheet has been determined individually. Useful lives are reviewed at the end of each reporting period and revised if necessary.

An asset is tested for impairment whenever there is an indication that the asset might be impaired:

- at the end of the first full financial year following the acquisition, and
- in other periods if events or changes in circumstances indicate that the carrying values may not be recoverable
- Intangible assets that are not amortised over a period are reviewed for impairment at the end of each reporting period

Any losses recognised as a result of impairment are treated as follows:

- Where there is a balance of revaluation gains for asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance up to the amount of the accumulated gains

If there is insufficient or no balance in the Revaluation Reserve, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

The reversal of an impairment loss is only recognised in the Comprehensive Income and Expenditure Statement if the value is directly attributable to the reversal of the event which caused the original impairment loss. Any gain or loss arising on the disposal or abandonment of an intangible asset is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement.

Where expenditure on intangible assets qualifies as capital expenditure for statutory purposes, amortisation, impairment losses and disposal gains and losses are not permitted to have an impact

on the General Fund Balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and the Capital Receipts Reserve for any sale proceeds greater than £10,000.

i. Landfill Allowances

Under the Waste and Emissions Trading Act 2003, the Council as a waste disposal authority is issued with landfill allowance permits on an annual basis for the amount of biodegradable waste that it is allowed to landfill. If the amount of biodegradable waste sent to landfill exceeds the allowance in any one year then additional permits are required to be purchased from other authorities or a cash penalty is paid to the government for the shortfall. The scheme is known as a 'cap and trade scheme'.

The fair value of allowances held by the Council (whether issued by the government or purchased from another authority) is recognised as an intangible current asset within the Balance Sheet. The fair value of allowances issued by the government is recognised as a government grant and accounted for in accordance with paragraph 12; (i.e., it is initially recognised as deferred income on the Balance Sheet and subsequently recognised as income on a systematic basis over the compliance year for which the allowances were allocated). The fair value of allowances is taken as the present market value at the Balance Sheet date.

The value of allowances after the initial recognition is measured at the lower of cost and net realisable value.

An estimate of expenditure required to settle the obligation to deliver allowances equal to the biodegradable and municipal waste landfill usage to the government is recognised as a liability (provision) on the Balance Sheet. The value of the provision is measured as the present market value at the Balance Sheet date of the number of allowances required to be delivered to the government and/or the cash penalty required for any shortfall in allowances.

14. Interests in Companies and Other Entities

The Council has some interests in companies and other entities that have the nature of subsidiaries, associates and jointly controlled entities and require it to prepare group accounts. In the Council's own single-entity accounts, the interests in companies and other entities are recorded in the Balance Sheet if the company has share capital, as financial assets at cost less any provision for losses. The Council records the name, business, shareholding, net assets and results of operations and other financial transactions of any related companies including cross-reference to where the accounts of the related companies may be acquired.

15. Inventories and Long-Term Contracts

Inventories held by the Council will be included in the Balance Sheet at the lower of cost and net realisable value. At present the Council has no holdings of this nature.

A long-term contract is 'A contract entered into for the design, manufacture or construction of a single substantial asset or the provision of a service (or of a combination of assets or services which together constitute a single project) where the time taken substantially to complete the contract is such that the contract activity falls into different accounting periods'. Long-term revenue contracts are charged to services in the Surplus or Deficit on the Provision of Services with the value of works and services received under the contract during the financial year and long-term capital contracts are charged to capital on the basis of the valuation certificate.

16. Investment Property

Investment properties are those that are used solely to earn rentals and / or capital appreciation. The definition is not met if the property is used in any way to facilitate the delivery of services or production of goods or is held for sale. In line with the requirements of IFRS 13, a review of investment properties was undertaken during 2015/16 with the result that £27.9m of investment properties have been reclassified as operational properties as it was determined that they were not being held solely for investment purposes, but have a significant operational element. Additional notes will be included in the Statement of Accounts as appropriate to explain the basis of the valuation of properties, and the categorisation required under IFRS 13.

Investment properties are measured initially at cost and subsequently at fair value (Highest and Best Use), based on the amount at which the asset could be exchanged between knowledgeable parties at arm's-length. Properties are not depreciated but are revalued annually, according to market conditions at the year end. Gains and losses on revaluation or disposal are posted to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Rentals received in relation to investment properties are credited to the Financing and Investment Income line and result in a gain for the General Fund Balance. However, revaluation and disposal gains and losses are not permitted by statutory arrangements to have an impact on the General Fund Balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and the Capital Receipts Reserve for sale proceeds above £10,000.

17. Jointly Controlled Operations and Jointly Controlled Assets

The Council is involved in arrangements with public sector partners to engage in joint activities that involve the use of the assets and resources of the partners rather than the establishment of a separate entity. Jointly controlled assets are items of property, plant or equipment that are jointly controlled by the Council and its partners, with the assets being used to obtain benefits for the partners. The Council accounts only for its share of the assets, liabilities, income, expenditure and cash flows held within the jointly controlled operations within its financial statements.

18. Leases

Leases are classified as finance leases where the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the property, plant or equipment from the lessor to the lessee. All other leases are classified as operating leases. Where a lease covers both land and buildings, they are considered separately for classification.

Arrangements that do not have the legal status of a lease but convey a right to use an asset in return for payment are accounted for under this policy where fulfilment of the arrangement is dependent on the use of specific assets.

i. The Council as Lessee

Finance Leases

Property, plant and equipment held under finance leases is recognised on the Balance Sheet at the commencement of the lease at its fair value measured at the lease's inception (or the present value of the minimum lease payments, if lower). The asset recognised is matched by a liability for the obligation to pay the lessor.

Initial direct costs of the Council are added to the carrying amount of the asset. Premiums paid on entry into a lease are applied to writing down the lease liability. Contingent rents are charged as expenses in the periods in which they are incurred.

Rentals payable are apportioned between:

- a charge for the acquisition of the interest in the property (recognised as a liability in the Balance Sheet at the start of the lease, at the lower of its fair value at inception or the present value of the minimum lease payment, matched by a liability for the obligation to pay the lessor – the liability is written down as the rent becomes payable), and
- a finance charge (debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement as the rent becomes payable).

Assets recognised under finance leases are accounted for using the policies applied generally to Property, Plant and Equipment, subject to depreciation being charged over the lease term if this is shorter than the asset's estimated useful life.

The Council is not required to raise council tax to cover depreciation, revaluation or impairment losses arising on leased assets. Instead, a prudent annual contribution is made from revenue funds towards the deemed capital investment in accordance with statutory requirements. Depreciation, revaluation and impairment losses are therefore substituted by a revenue contribution in the General Fund Balance, by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement for the difference between the two.

Operating Leases

Where assets are acquired by the Council (as a lessee) under operating leases, the leasing rentals payable are charged to the revenue accounts of those services that use the assets as they are made.

Any hire purchase contracts that have similar characteristics to an operating lease are accounted for as an operating lease and disclosed in a note to the Balance Sheet.

ii. The Council as Lessor

Finance Leases

Where the Council grants a finance lease over a property or an item of plant or equipment, the relevant asset is written out of the Balance Sheet as a disposal. At the commencement of the lease, the carrying amount of the asset in the Balance Sheet (whether Property, Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. A gain, representing the Authority's net investment in the lease, is credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal), matched by a lease (long-term debtor) asset in the Balance Sheet.

Operating Leases

An asset held by the Council for use in operating leases by a lessor is retained in the Balance Sheet and depreciated over its useful life. Rental income from operating leases, excluding charges, is recognised in the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as income is received.

This policy is a departure from the Code which states that rentals receivable should be charged to revenue on a straight-line basis over the term of the lease, even if this does not match the pattern of the payments. The Council believes that this departure from the Code is not material.

19. Overheads and Support Services

The costs of overheads and support service costs (e.g., legal, human resources and finance) are charged to the relevant teams and departments (i.e., the front line service departments) in the management structure on the face of the income and expenditure statement. They are not charged on the front line service headings within the income and expenditure statement, in line with CIPFA guidance.

20. Property, Plant and Equipment (PPE)

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment (PPE).

i. Recognition

Items of PPE that qualify for recognition will be measured at cost and capitalised on an accruals basis. Cost is defined as either purchase price, costs attributable to bringing the asset to location and condition necessary for it to be capable of operating in the manner intended by management or the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

ii. De-Minimis

Capitalisation of expenditure on PPE is not necessary where the amounts involved are not material to the true and fair presentation of the financial position and transactions of the authority and to an understanding of the Statement of Accounts by a reader. The Council has agreed a de-minimis level of £10,000 for expenditure to be capitalised, with the exception of capital works for schools where the de-minimis level is £1,000, and in order to utilise ring-fenced funding where no de-minimis is applied.

iii. Measurement

Assets will be disclosed and valued on the Balance Sheet on the following bases:

Asset Category	Valuation Method
Assets under Construction Infrastructure Assets	Depreciated Historic Cost
Council Dwellings	Fair Value (Existing Use Value – Social Housing) EUV-SH
Community Assets	Depreciated Historic Cost or Valuation in accordance with section 4.10 of the Code
Other, Land and Buildings Vehicles, Plant and Equipment	Fair Value (Existing Use Value) EUV or DRC*
Surplus Assets	Fair Value (Highest and Best Use)
Heritage Assets	Individual Asset Valuation

* Depreciated Replacement Cost (DRC) using the 'instant build' will be used if Existing Use Value (EUV) cannot be determined.

A full valuation of a property is conducted by the Council's internal valuer, Mr. C. Hoggeth, the Council's Estates Unit Manager and also a Professional Member of the Royal Institution of Chartered Surveyors (RICS). The valuations have been prepared in accordance with the Practice Statements and UK Practice Statements contained in the RICS Appraisal and Valuation Standards.

The asset valuations have been prepared using the following assumptions:-

- a) The Council has good title free from encumbrances;
- b) There are no hazardous substances or latent defects in the properties and there is no contamination present;
- c) The properties have permanent planning permission and any other necessary statutory consent for their current use;
- d) Plant and machinery is included in the valuation of the property, where applicable;
- e) No special circumstances beyond those likely to be considered by a prospective purchaser in the open market have been taken into account;
- f) No allowance has been made for any liability to taxation, which may arise on disposal, nor for costs of acquisition or realisation.
- g) All transactions agree with the Council's de-minimis level

Not all properties were specifically inspected for the purpose of asset valuations. This was neither practicable, nor considered by the valuer to be necessary, for the purpose of the valuation. However, regular inspections are made by the Council's Property Section of all the Council's property assets. The inspections and report do not purport to be a building survey.

The Council operates a 5 yearly revaluation cycle for all assets, with the exception of Council Dwellings and Investment properties which are reviewed on an annual basis as per the Code's requirements.

Any changes in valuation will be recorded in the balance sheet as per the accounting guidelines outlined in the Code.

iv. Depreciation

Depreciation is provided for on all Property Plant and Equipment by the allocation of their depreciable amounts over their useful lives, in line with IAS 16. An exception is made for assets without a determinable useful life (e.g. freehold land and some community assets) and assets not yet available for use (e.g. assets under construction). The useful lives of assets are estimated on a realistic basis and are reviewed on a regular basis and, where necessary, revised. Where the useful life of a fixed asset is revised, the carrying amount of the fixed asset is depreciated over the revised remaining useful life. Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been charged based on their historical cost being transferred from the Revaluation Reserve to the Capital Adjustment Account.

Depreciation is calculated on the amount at which the asset is included in the Balance Sheet, whether current cost or historical cost. Depreciation has been calculated as follows:

- All assets are depreciated on straight line basis over the useful life of the asset taking into account land value and residual value. The range of estimated lives of each asset is set out in note 24.
- Investment Properties are not depreciated as per the Code's guidance; instead they are revalued on an annual basis.
- Newly acquired assets are not depreciated in the year of acquisition, while assets under construction are only depreciated once the asset becomes operational.
- Community assets are also exempt from depreciation requirements as a determinable finite useful life cannot be obtained.
- Assets are depreciated in the year of disposal.

A change from one method of providing depreciation to another is only made where the new method will give a fairer presentation of the results and of the financial position. Such a change does not, however, constitute a change of accounting policy; the carrying amount of the fixed asset is depreciated using the revised method over the remaining useful life, beginning in the period in which the change is made.

Componentisation

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item should be depreciated separately. Where there is more than one significant part of the same asset which has the same useful life and depreciation method, such parts may be grouped in determining the depreciation charge. In practice this can be achieved by only separately accounting for significant components that have different useful lives and/or depreciation methods.

The policy will be to componentise part of assets where the part subject to componentisation is more than £500k or 10% or more of the building value of the asset and the value of the building itself is greater than £5m. Any amounts below these levels would not be considered material enough for componentisation purposes.

v. Impairment

The value at which each category of assets is included in the Balance Sheet is reviewed at each year-end. Where there is reason to believe that its value has changed materially in the period, the recoverable amount of the asset is estimated and where this is less than the carrying amount, an impairment loss is recognised for the shortfall. Events and changes in circumstances that indicate a reduction in value may have incurred include:

- a significant decline in an asset's market value during the period
 - evidence of obsolescence or physical damage to the asset
 - a significant adverse change in the statutory or other regulatory environment in which the Council operates
 - a commitment by the Council to undertake a significant reorganisation.
- Where impairment losses are identified, they are accounted for as follows:
- Where there is a balance of revaluation gains for asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance, up to the amount of the accumulated gains
 - If there is insufficient or no balance in the Revaluation Reserve, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement

Where an impairment loss is subsequently reversed, the reversal is credited to the relevant service line(s) in the Comprehensive Income and Expenditure Statement, up to the amount of

the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

vi. Disposals and Non-Current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered through a sale rather than continuing use, it is reclassified as an Asset Held for Sale, but only if the following criteria are met:

- a) The asset must be available for sale in its present condition subject to terms that are usual and customary for sales of such assets.
- b) The sale must be highly probable, the appropriate level of management must be committed to a plan to sell the asset and an active programme to locate a buyer and complete the plan must have been initiated.
- c) The asset must be actively marketed for a sale at a price that is reasonable in relation to the current value.
- d) The sale should be expected to qualify for recognition as a completed sale within one year of the date of classification and action required to complete the plan should indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

Immediately before reclassification it is revalued and carried at the lower of this figure and fair value (Highest and Best Use) less costs to sell. Where there is a subsequent decrease to fair value less costs to sell, the loss is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Gains in fair value are recognised only up to the amount of any losses previously recognised in the Surplus or Deficit on Provision of Services. Assets Held for Sale are not depreciated.

If an asset no longer meets the criteria to be classified as Assets Held for Sale, they are classified back to non-current assets at the lower of their carrying amount before they were classified as held for sale (adjusted for depreciation, amortisation or revaluations that would have been recognised if they had not been classified as Held for Sale) and their recoverable amount at the date of the decision not to sell. Assets that are abandoned or scrapped are not reclassified as Assets Held for Sale.

When an item of Property, Plant, Equipment or Asset Held for Sale is disposed of or decommissioned, the carrying amount of the asset in the Balance Sheet is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals are credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal.

Amounts received in excess of £10,000 are categorised as capital receipts. The proportion that is required to be paid over to Central Government for housing disposals is appropriated to the Capital Receipts Reserve from the General Fund Balance in the Movement in Reserves Statement.

Where a fixed asset is disposed of for other than a cash consideration, or payment is deferred, an equivalent asset is recognised and included in the balance sheet at its fair value.

The written-off value of disposals is not a charge against council tax because the cost of fixed assets is fully provided for under separate arrangements for capital financing. Amounts are appropriated to the Capital Adjustment Account from General Fund Balance in the Movement in Reserves Statement.

21. Private Finance Initiative (PFI) and Similar Contracts

PFI and similar contracts are agreements to receive services, where the responsibility for making available the property, plant and equipment needed to provide the services passes to the PFI contractor. The Council has one PFI contract with Reading and Bracknell Councils for waste disposal under the RE3 Partnership. The Council receives the benefit of the services that are provided under its PFI scheme and ownership of the property, plant and equipment will pass to the partnership at the end of the contract for no additional charge. The Council carries its share of the property, plant and equipment used under the contracts on the Balance Sheet.

The original recognition of these assets was balanced by the recognition of a liability for amounts due to the scheme operator to pay for the assets. Non-current assets recognised on the Balance Sheet are revalued and depreciated in the same way as property, plant and equipment owned by the Council.

The amounts payable to the PFI operators each year are analysed into five elements:

- fair value of the services received during the year – debited to the relevant service in the Comprehensive Income and Expenditure Statement
- finance cost – an interest charge of 6.9% on the outstanding Balance Sheet liability, debited to Financing and Investment Income line in the Comprehensive Income and Expenditure Statement
- payment towards liability – applied to write down the Balance Sheet liability towards the PFI operator
- lifecycle replacement costs – Proportion of the amounts payable is posted to the Balance Sheet as a prepayment and then recognised as additions to Property, Plant and Equipment when the relevant works are eventually carried out.

22. Provisions, Contingent Liabilities and Contingent Assets

i. Provisions

Provisions are made for any liabilities of uncertain timing or amount that have been incurred. Provisions are recognised when:

- the Council has a legal or constructive obligation as a result of a past event
- it is probable that a transfer of economic benefits or service potential will be required to settle the obligation, and
- a reliable estimate can be made of the amount of the obligation.

Provisions are charged to the appropriate service line in the Comprehensive Income and Expenditure Statement in the year that the Council becomes aware of the obligation. The amount recognised as a provision is the best estimate taking into account the risks and uncertainties surrounding the events. When payments for expenditure are incurred to which the provision relates they are charged direct to the provision carried in the Balance Sheet. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that a transfer of economic benefits will be required to settle the obligation (or a lower settlement than anticipated is made), the provision is reversed and credited back to the relevant service.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised as income for the relevant service only when it is virtually certain that reimbursement will be received if the obligation is settled.

In the case of a provision for bad or doubtful debts, the carrying amount of debtors is adjusted and known uncollectable debts are written off.

ii. Contingent Liabilities

A contingent liability arises where an event has taken place that gives the Council a possible obligation whose existence will only be confirmed by the occurrence of uncertain future events not wholly within the control of the Council. Contingent liabilities are not recognised in the accounting statements; they are disclosed by way of notes if there is a possible obligation that may require a payment or a transfer of economic benefits. For each class of contingent liability, the nature of the contingency, a brief description, an estimate of its financial effect, an indication of the uncertainties relating to the amount or timing of any outflow and the possibility of any reimbursement will be disclosed.

iii. Contingent Assets

A contingent asset arises where an event has taken place that gives the Council a possible asset whose existence will only be confirmed by the occurrence of uncertain future events not wholly within the control of the Council. Contingent assets are not recognised in the accounting statements; they are disclosed by way of notes if the inflow of a receipt or economic benefit is probable. The disclosures indicate the nature of the contingent asset and an estimate of its financial effect.

23. Reserves

Transfers to and from reserves are distinguished from service expenditure. The movements in reserves available to this Council are detailed in a note to the financial statements. Reserves include earmarked reserves set aside for specific policy purposes and balances which represent resources set aside for purposes such as general contingencies and cash flow management.

When expenditure to be financed from a reserve is incurred, it is charged to the appropriate service in the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement. The reserve is then appropriated back into the General Fund Balance in the Movement in Reserves Statement so there is no net charge against council tax for the expenditure.

Most capital reserves are not available for revenue purposes and some of them can only be used for specific statutory purposes. The Revaluation Reserve and Capital Adjustment Account are non-distributable reserves. The Capital Receipts Reserve is a reserve established for specific statutory purposes.

The Major Repairs Reserve is required by statutory provision to be established in relation to the HRA in England.

24. Revenue Expenditure Funded from Capital under Statute

Revenue expenditure classified as capital under statute, formerly known as deferred charges, represents expenditure that may be capitalised but does not result in the creation of non-current assets. The expenditure has been charged to the relevant service in the Comprehensive Income and Expenditure Statement in the year. Where the Council has determined to meet the cost of this expenditure from existing capital resources or by borrowing, a transfer in the Movement in Reserves Statement from the General Fund Balance to the Capital Adjustment Account then reverses out the amounts charged so there is no impact on the level of council tax.

25. VAT

VAT payable is included as an expense, whether of a capital or revenue nature, only to the extent that it is irrecoverable. VAT receivable is excluded from income.

26. Group Accounts

The Code requires the Council to consider all of its interests and to prepare a full set of group accounting statements where there are material interests in subsidiaries, associates and joint ventures. The Council has investigated all potential interests that could qualify for group accounts and has determined it has five group relationships which qualify for the preparation of, and inclusion in, group accounts. The companies all operate the same financial year and follow the same accounting policies as Wokingham Borough Council.

27. Heritage Assets

Heritage assets are assets that are held by the Council principally for their contribution to knowledge and culture. The Code of Practice on Local Authority Accounting in the United Kingdom 2011/12 introduced a change to the treatment in accounting for heritage assets held by the Council so that heritage assets must be shown separately on the balance sheet. The Council undertook a detailed review and at present does not have any heritage assets.

28. Tax Income (Council Tax, and Non-Domestic Rates)

Non-Domestic rates (NDR)

- Retained Business Rate income included in the Comprehensive Income and Expenditure Statement for the year will be treated as accrued income.
- Levy expenditure included in the Comprehensive Income and Expenditure Statement for the year will be treated as accrued expenditure

Council Tax

- Council Tax income included in the Comprehensive Income and Expenditure Statement for the year will be treated as accrued income

Both NDR income, less tariff and levy expenditure, and Council tax will be recognised in the Comprehensive Income and Expenditure Statement in the line Taxation and Non-Specific Grant Income. As a billing authority the difference between the NDR and Council Tax included in the Comprehensive Income and Expenditure Statement and the amount required by regulation to be credited to the General Fund shall be taken to the Collection Fund Adjustment Account and reported in the Movement in Reserves Statement. Each preceptor's share of the accrued NDR and Council Tax income will be available from the information that is required to be produced in order to prepare the Collection Fund Statement.

The income for Council Tax, and NDR, is recognised when it is probable that the economic benefits or service potential associated with the transaction will flow to the authority, and the amount of the revenue can be measured reliably. Revenue relating to such things as council tax, business rates, etc., shall be measured at the full amount receivable (net of any impairment losses) as they are non-contractual, non-exchange transactions and there can be no difference between the delivery and payment dates.
