Agenda Item 20.

# Background

- Government Health Infrastructure Plan (HIP) – funding for 40 new hospital projects over the next ten years.
- RBFT one of 21 Trusts to receive seed funding to develop ideas.
- All possibilities will be considered.
- Major opportunity for the Trust and for our local communities to improve services, patient experience and the environment.

# The Case for Change... the 5Cs

- The existing hospital buildings are in poor **condition**, resulting in poor patient experience, poor working conditions for staff, high maintenance costs and safety risks too.
- The hospital is operating beyond its current **capacity** and expected local population growth will only mean greater health needs and rising demand for services.
- The existing buildings were designed to support an 18<sup>th</sup> and 19<sup>th</sup> century model of clinical care. The buildings limit the **capability** of our staff to provide high quality modern healthcare for our local communities.
- The existing buildings are a poor environment for patients and staff, and they contribute to the **climate** emergency. We need a green, low-carbon hospital.
- Developing a healthcare campus for Berkshire would generate jobs and economic growth and act as a **catalyst** for the local economy for years to come.

## Our Vision 2025

STORIES

The Royal Berkshire NHS Foundation Trust has a rich history of providing healthcare to the people of Reading, west Berkshire and south Devonshire. We are committed to innovating, always looking ahead to the challenges of the future, and the health and wellbeing of the people we serve.

In our Vision 2025 document we commit to working in partnership with our staff, our patients and visitors, our health and social care colleagues, and with other local organisations across the community to bring together the best we can offer today and tomorrow.

Our Vision 2025 strategy sets out where we are and where we stand for as well as covering the current challenges we face and our priorities for the future. The development of our new hospital is integral to this as set out in our Vision 2025 strategy.

You can read the full Vision 2025 document here.

Microsites inspire you and give you confidence. Read the Royal Berkshire NHS Foundation Trust has the vision, the determination, and the people to ensure we can better future for our patients.

### Our Strategic Priorities

- Provide the highest quality care**  
 Provide the highest quality care so that safety and equity for every patient is our top priority, and all our services are outstanding every day of the year.
- Invest in our Staff and Live Out Our Values**  
 Invest in our staff and live out our values so that all the services, support, methods, processes and reward strategies will be staff.
- Drive the Development of Integrated Services**  
 Drive the development of

## Vision 2025

Our Vision 2025 Strategy sets out who we are and what we stand for. Read more about it here.

The Royal Berkshire NHS Foundation Trust is beginning a major modernisation of its hospitals across Berkshire involving the investment of hundreds of millions of pounds over the next ten years.

Options for change include a combination of rebuilding and refurbishment on the present Royal Berkshire Hospital site in Reading or the development of a completely new hospital on a new site. This is an important modernisation project, but it is about much more than simply new buildings. Our intention is to

transform the quality of our care, the experience of our patients and the workplace for our staff.

Our Vision 2025 strategy says we will work in partnership with our staff, our patients and visitors, our health and social care colleagues, and with other local organisations to provide outstanding care for our community. This modernisation project will help us realise our Vision 2025 strategy. We intend to develop a health and care facility with full digital capability in mind. It will have the latest facilities for patients who require hospital care and the latest technology to ensure that more patients can be treated without the need for a hospital visit.

Every service, every department, every building will be designed with the latest technology built in and we will embed the new ways of working that are rapidly emerging as a result of the COVID-19 pandemic. Our intention is to create a new hospital our local communities can be proud of and can rely upon.

We now need your views and your ideas.

We have an opportunity to develop a masterplan, or blueprint for an amazing hospital, designed and organised from the ground up. This is our opportunity to create a great hospital for local people, delivering great care and treatment, and we want our staff, patients, partners and local communities to help us design it. We want this new hospital to be built with the real needs of patients and staff firmly in mind. We want their expertise, experience, and ambition to flow through the design of our new hospital.

Please take a little time to explore this engagement website and then tell us what you think.
