COMMENTS:

The Shinfield Parish Council (SPC) would like to bring the following to the attention of WBC with regard to this application.

&65533;It is paramount that Beke Avenue does not become another arterial route for traffic and there remains a method to allow only buses to continue through to the larger housing estate to the western end of Beke avenue.

&65533;Provision must be made for the safe passage of pedestrians along footpath 11 that crosses Beke Avenue.

&65533;The proposed pedestrian crossing must be cited in coordination with footpath 11.

&65533;Footpath 11 traverses the proposed area of the supermarket and carpark so must be planned with safety in mind for pedestrians and shoppers.

&65533;SPC are keen to relocate the recycling banks and mobile catering unit on School Green car park and believe the area inbetween the community centre and Beke Avenue could be an ideal location as it is away from houses with easy access. The parking spaces would therefore be reserved for dropping off bottles and allowing the collection lorry to pick up the bottle banks on collection day.

&65533;When considering Beke Avenue it is important to visualise the role it has to play in uniting the Community Centre with the proposed food store and retail outlets and not as a road in isolation. Verges to either side are important thoroughfares for pedestrians and shoppers within the parish.
