Business Case Type	Savin	gs						
Business Case Name	EXISTING - Waste	Collection Service	ce (Changes (linked to	bid o	no. PG.R28)		
Description and link to Service plan Inc. (Reason. i.e. Demand / Legislative / Policy / Discretionary / service design)	the following week, The change to the factorial refuse was approve undertaken and the in the borough. The	Change from weekly collections to fortnightly collections (refuse one week recycling he following week, food waste weekly). The change to the frequency of waste collections and introducing wheeled bins for efuse was approved by Executive in 26th March 2023. Two consultations were undertaken and the majority were in agreement to change the way waste is collected in the borough. These changes will improve our recycling performance, decrease our carbon generation and realise savings.						
Provide details of change in demand (include trends) and/or costs and benchmarks. Show alternatives that have been considered and whether budget service has had previous budget changes	The change from w waste collections) v reduction agendas.	vill realise saving	js w	hilst boosting the	envir	onmental and	d carbon	
Detail the external and organisational implications if this is not successful.	Not realising the £1 in place to continua could affect this.

This is created due to the limited ability to deal with the specific high demand locations close to stations, retail centres and existing resident parking areas. The project will amount to approximately 500 - 800 spaces in the first instance, with a simultaneous review of residents permit holder provision so that availability meets demand and expansion of the permit holder scheme.

Business Case Name	Historic electricity sa	Historic electricity saving							
Description and link to Service plan Inc. (Reason. i.e. Demand / Legislative / Policy / Discretionary / service design)	This is a historic saving requirement that the service has never managed to deliver. In order to set accurate budgets for future years, this needs to be resolved. For background, it is understood that the original saving was estimated when the LED Street Lighting Project was carried out. It was based on expected savings as a result of LED being implemented. However, due to the significant increase of energy prices, this resulted in an increase in cost overall.								
Provide details of change in demand (include trends) and/or costs and benchmarks. Show alternatives that have been considered and whether budget service has had previous budget changes	A one-off solution has been found to cover 2024/25 meaning the growth is requested from 2025/26.

Business Case Type	Growth							
Business Case Name	Review access to f	ree parking at Car	nival multi-story Ca	r Park				
Description and link to Service plan Inc. (Reason. i.e. Demand / Legislative / Policy / Discretionary / service design)	We currently offer users of the Carnival Pool Leisure centre 2 hours free parking as part of the contractual arrangements agreed in our Leisure Contract. A review into the possibility of changing this has not succeeded, therefore this proposal needs to be removed having been put into the budget in 2023/24. The leisure contract has this free parking within it, when the contract is re procured it could be reviewed, albeithe option for users of the leisure centre to park without a charge continues to be an important benefit given a competitive leisure market place.							
Provide details of change in demand (include trends) and/or costs and benchmarks. Show alternatives that have been considered and whether budget service has had previous budget changes	A one-off solution has been found to cover 2024/25 meaning the growth is requested from 2025/26.							
Detail the external and organisational implications if this is not successful.	Parking will continue as in 2023/24 with an income budget that is unachievable and mean the service will be forecasting an overspend from day one of the year.

Business Case Name	Making Climate Emergency Officer Posts Permanent						
Description and link to Service plan Inc. (Reason. i.e. Demand / Legislative / Policy / Discretionary / service design)	The Climate Emergency team has two fixed term posts which are funded via a special item until 2024. This growth request is to make these two posts permanent. These posts are integral for the delivery of the Climate Emergency Programme as set out in the Climate Emergency Action Plan. Tackling climate emergency is a key priority for the Council.						
Provide details of change in demand (include trends) and/or costs and benchmarks. Show alternatives that have been considered and whether budget service has had previous budget changes	Climate emergency is an increasing priority for the current political administration, and a key theme of the Council's corporate plan. Climate emergency is an increasing priority for central government, with increasing legislation and regulation. Both posts will apply, or support Council teams to apply for government grant schemes. As an example, this year the Climate Emergency team secured £292k from the Social Housing Decarbonisation Scheme. We anticipate both posts will continue to generate income for the Council through applications to government and private grant schemes. With regards to cross-Council implications, both posts address cost of living costs crisis and rising energy costs.

Special Item							
Planning and Enforce	<u> </u>						
Previously agreed Special Item to fund additional development management posts added to the establishment in 2019/20 and 2020/21 focussed upon planning enforcement and planning appeal work. The Special Item enables the retention of additional senior professional staff to support the planning and enforcement process. It also provides for an additional post to lead and manage 20 staff who transferred from CIC in January 2021. Planning is a statutory service, which continues to perform well against national comparators. The retention of the additional resources provided enables a continued focus on Enforcement, Planning Appeals and the efficient throughput of planning applications. Breaches of planning control remain high and there is an ongoing need to resource our enforcement work at current levels. Planning appeal work remains steady but cases are becoming increasingly complex and resource-intensive. The Council no longer has a 5-year housing land supply and so an increase in appeals for speculative housing development is expected.							
							The headcount of the Development Management Team would need to be reduced by approximately 3/4 posts. This would give a significantly reduced ability for the service to: undertake planning enforcement work; successfully defend planning and

the amount of incor	4h.aaa.a.l.a.	udget in	line with the	post covid position.						
Covid has changed the way people use car parks and has resulted in a reduction in the amount of income the council receives. There are additional income proposals around increasing charges and hours of charging but there is a significant budget pressure through the inability to generate the level of car parking income that existed pre-covid that needs to be addressed first. The current level of demand is anticipated to increase year on year for the next couple of years. This special item exaters for that happening.										
The current forecast for 2023/24 is a £150k income shortfall that is forecast to happen again at a similar figure if the budget is not adjusted to reflect the post Covid position.
